

**TC on Sprinkler System Installation
ROP Meeting
Savannah Riverfront Marriott
100 General McIntosh Blvd
Savannah, GA
February 7-9, 2011**

Attendees:

See attached sign-in sheet.

1. Joe Noble called the meeting to order at 8:00 am and began introductions.
2. The December 2010, Pre-ROP minutes were approved.
3. Richard Bielen gave the staff report and a presentation on the meeting procedures. He also reviewed the dates of the cycle.
4. Joe Noble then discussed the logistics for the meeting and his process to complete the ROP.
5. The committee then processed the proposals. See the ROP for the official actions on the proposals.
6. There was no old business.
7. New business. The committee discussed the issues of installation criteria and cloud ceilings. There were many unknowns of how smoke and heat will flow and effect the sprinkler activation. The committee recommended that the NFPA Research Foundation conduct a project on cloud ceilings. This request will be made to them.

The committee received a request from the Technical Committee on Animal Housing Committee for the need for sprinklers both Category A and B facilities. The Technical Committee on Installation Criteria does not have jurisdiction or advice on when to sprinkler Category A or B facilities. This decision should be left with the Technical Committee on Animal Housing. However, if the need to sprinkler the facility is determined, it should be in accordance with NFPA 13.

8. The ROC meeting is scheduled for September 19-20, 2011 in Newport Beach, CA
9. Meeting adjourned at 2:30 pm.
