F.I. No.: 1403-07-01

Question No. 1: Do the requirements of NFPA 1403 allow for the use of propane lighters, butane lighters (BBQ grill and cigarette lighters) need flares, kitchen-type matches, and similar-sized devices as an acceptable device to ignite the training fire in a live fire training exercise in a Class A burn building or an acquired structure, if the device is removed immediately after ignition of the training fire?

Answer: Yes.
