

Tentative Interim Amendment

# NFPA 1901

## Standard for Automotive Fire Apparatus

2009 Edition

**Reference:** 19.24.2.5.1 (New)

**TIA 09-3**

(SC 09-8-32/TIA Log #958)

Pursuant to Section 5 of the NFPA Regulations Governing Committee Projects, the National Fire Protection Association has issued the following Tentative Interim Amendment to NFPA 1901, *Standard for Automotive Fire Apparatus*, 2009 edition. The TIA was processed by the Technical Committee on Fire Department Apparatus, and was issued by the Standards Council on August 6, 2009, with an effective date of August 26, 2009.

A Tentative Interim Amendment is tentative because it has not been processed through the entire standards-making procedures. It is interim because it is effective only between editions of the standard. A TIA automatically becomes a proposal of the proponent for the next edition of the standard; as such, it then is subject to all of the procedures of the standards-making process.

*1. Add a new subsection to read as follows:*

**19.24.2.5.1** For aerial devices that have computer controlled, or electronically controlled, limitations to the range of aerial movement, a test as defined by the manufacturer, shall be performed to validate the proper operation of the control system.

**Issue Date:** August 6, 2009

**Effective Date:** August 26, 2009
