

Tentative Interim Amendment

NFPA 1911

Standard for the Inspection, Maintenance, Testing, and Retirement of In-Service Automotive Fire Apparatus

2007 Edition

Reference: 19.8.4.10(7) (New)
TIA 07-1
(SC 09-8-32/TIA Log #958)

Pursuant to Section 5 of the NFPA Regulations Governing Committee Projects, the National Fire Protection Association has issued the following Tentative Interim Amendment to NFPA 1911, *Standard for the Inspection, Maintenance, Testing, and Retirement of In-Service Automotive Fire Apparatus*, 2007 edition. The TIA was processed by the Technical Committee on Fire Department Apparatus, and was issued by the Standards Council on August 6, 2009, with an effective date of August 26, 2009.

A Tentative Interim Amendment is tentative because it has not been processed through the entire standards-making procedures. It is interim because it is effective only between editions of the standard. A TIA automatically becomes a proposal of the proponent for the next edition of the standard; as such, it then is subject to all of the procedures of the standards-making process.

1. Add a new subsection to read as follows:

19.8.4.10 (7) For aerial devices that have computer controlled, or electronically controlled, limitations to the range of aerial movement, a test shall be performed to validate the proper operation of the control system, as defined by the manufacturer.

Issue Date: August 6, 2009

Effective Date: August 26, 2009
