The NFPA News is a compilation of codes and standards information and activities. We attempt to cover all important details during the codes and standards cycle process so that the public is aware of what is available and what is needed. We want to make the NFPA News an even more valuable tool for you. Please forward your ideas to nfpa_news@nfpa.org or contact Carolyn Cronin at 617-984-7240.

Submit Public Input (formerly proposals) Electronically on Annual 2015 Documents

NFPA documents in the Annual 2015 revision cycle are now accepting Public Input (formerly proposals) electronically through NFPA's Electronic Submission System (e-PI). The system will automatically pull in the text and show any changes in "track changes" and even saves your input.

To submit input electronically, select the document from the [list of NFPA codes and standards](#) or search for documents available for public input using the search feature. Once on the document page, select "The next edition of this standard is now open for Public Input (formerly proposals)" to begin the process. You can submit input or just start and save your work in progress before the closing date.

[Review further instructions on how to use the e-PI system](#)

If you have any questions when you use the new system, you can contact Carolyn Cronin at (617) 984-7240 or by email at ccronin@nfpa.org.

Compressed Gases and Cryogenic Fluids Code

Reference: A.7.3.1.12.1

Errata No.: 55-13-1

www.nfpa.org/55

The Committee on Industrial and Medical Gases notes the following error in the 2013 edition of NFPA 55, *Compressed Gases and Cryogenic Fluids Code*.

1. Add the following text to A.7.3.1.12.1 to read:

Bulk cryogenic fluids are not subject to the requirements for excess flow control based on a health hazard ranking due to cold temperature when installed in accordance with the requirements of Chapters 8 or 9. Bulk cryogenic fluids that are vaporized and distributed as a compressed gas downstream of the source valve are subject to the requirements for excess flow control if the gas has either a health hazard rating of Class 3 or 4 based on corrosivity or toxicity, a flammability hazard ranking of Class 4, or a reactivity ranking of Class 3 or 4.

Seeking Enforcers for the Technical Committee on Shipbuilding, Repair, and Lay-Up

The NFPA Technical Committee on Shipbuilding Repair and Lay-up, [NFPA 312](#), which covers safeguarding against the fire and explosion hazards associated with vessels in course of construction, under repair, and during lay-up.

NFPA is looking for qualified individuals to join this very important Committee. In particular we are looking for persons in the Enforcers classification such as municipal fire departments that have shipyards and vessel repair facilities in their area of jurisdiction. We especially need individuals with knowledge and expertise in the enforcement of local codes and standards that are designed to protect shipyard employment workers from the hazards of fire on vessels and vessel sections and at land-side facilities.

Apply today on the document’s information page at www.NFPA.org/312tc.

Committee Leadership Conference

The [Committee Leadership Conference \(CLC\)](#) will be held on Sunday, June 9, 2013, during the [NFPA Conference and Expo®](#) at the McCormick Place Convention Center, Chicago, IL. The registration for the CLC will start at 8:00 a.m. on June 9th.

The Committee Leadership Conference is held at each June Annual Meeting. This Conference is an interactive training program that provides each NFPA Committee officer and member with specific training in carrying out the duties and responsibilities of committee work. This session will be based on the new regulations, [Regulations Governing the Development of NFPA Standards](#). The CLC is open to anyone who wishes to attend. To reserve a seat, please contact the Codes and Standards Administration at 617-984-7246 or by email at stds_admin@nfpa.org.

Standards Forum

The [NFPA Standards Forum](#) will be held on Tuesday, June 11, 2013, during the [NFPA Conference and Expo®](#) at the McCormick Place Convention Center, Chicago, IL. NFPA has streamlined and simplified the Codes and Standards Process. Similar to last year, at this session technical committee members and interested parties will be able to hear about the latest changes to the *New Regulations Governing the Development of NFPA Standards* and the associated software under development.

Attendees will have a chance to see the Electronic Submission System available on NFPA's website. This system allows the pub-

lic to electronically submit Public Input (formerly Proposals) and Public Comments (formerly Comments) directly to the document, and after the closing dates, virtually render a "publication ready" document. Technical Committee members will learn the ease of the system's functionality that will ultimately simplify committee meetings.

The Standards Forum is open to any registered conference attendee who wishes to attend.

NFPA News in Brief

Latest News directly impacting NFPA's Codes and Standards.

Safety concerns persist at nightclubs worldwide

More than 230 people were killed last weekend at a nightclub fire in Brazil. Ask a life safety expert if [conditions at nightclubs and other places of assembly](#) have improved since the Station fire a decade ago, and the answer will most likely be a mixed bag. "The awareness level of the need for preparedness — whether it's crowd manager training or emergency action plans — has risen fairly substantially," says Harold Hansen, director of Life Safety and Security for the International Association of Venue Managers (IAVM) and member of the NFPA 101®, Life Safety Code®, Assembly Occupancies Committee.

Rebuilding a hospital

On May 22, 2011, one of the most powerful tornadoes ever recorded destroyed St. John's Regional Medical Center in Joplin, Missouri. NFPA Journal® examines some of the key lessons learned from that event and [how they are being incorporated into the design, construction, and emergency planning](#) to build a new facility better able to withstand the rigors of life in Tornado Alley.

Lightweight construction and firefighter safety

New methods of construction negatively impact firefighter safety under fire conditions. Studies point to the failure of lightweight engineered wood systems routinely used in floors and roofs of new homes. [NFPA has created a free online presentation](#) that you can use to help educate your community's decision-makers and the public about the dangers of lightweight construction materials under fire conditions.
