The NFPA News is a compilation of codes and standards information and activities. We attempt to cover all important details during the codes and standards cycle process so that the public is aware of what is available and what is needed. We want to make the NFPA News an even more valuable tool for you. Please forward your ideas to nfpa_news@nfpa.org or contact Carolyn Cronin at 617-984-7240.

Comments Sought on Tentative Interim Amendments (TIAs)

The following Tentative Interim Amendments (TIAs) have been proposed to NFPA. They are being published for public review and comment. Comments should be filed with the Secretary, Standards Council, by the date indicated below, to TIAs_Errata_FIs@nfpa.org.

The proposed TIAs have also been forwarded to the responsible technical committee for processing. The technical committee will consider public comments received by the date indicated below before vote is taken on the proposed TIA. (Please identify the number of the TIA to which the comment is addressed.) Three-fourths of the voting members of the technical committee and/or the correlating committee, if any, must vote in favor of the TIA on both technical merit and emergency nature as calculated in accordance with 3.3.4.3 of the *Regulations Governing the Development of NFPA Standards* to establish a recommendation for approval of the TIA.

The Standards Council will review the technical committee and/ or the correlating committee, if any, ballot results, the public comments, and any other information that has been submitted when it considers the issuance of the TIA at the October 22-23, 2013 Standards Council meeting. In accordance with 1.6.2(c) of the Regs, a proposed TIA which has been submitted for processing pursuant to 5.1 of the Regs shall be filed no later than 5 days after the notice of the TIA ballot results are published in accordance with 4.2.6.

A TIA is tentative because it has not been processed through the entire Standards Development process. It is interim because it is effective only between editions of the document. A TIA automatically becomes a public input of the proponent for the next edition of the document. As such, it then is subject to all of the procedures of the Standards Development process.

NFPA 1981-2013

Standard on Open-Circuit Self-Contained Breathing Apparatus (SCBA) for Emergency Services

TIA Log No. 1111

Reference: 4.1.11 and 4.1.12

Comment Closing Date: August 12, 2013

Submitters: Dan Rossos, Oregon Department of Public Safety Standards & Training; Bill Haskell, NIOSH/NPPTL; Robert Athanas, FDNY

www.nfpa.org/1981

1. Revise 4.1.11 and 4.1.12 to read as follows:

4.1.11 The certification organization shall not permit any manufacturer to label any SCBA as compliant with the 2007 edition of this standard on or after ~~31 August 2013~~ 28 February 2014, except when replacement labels or replacement components that bear the certification organization's label are required.

4.1.12 The certification organization shall require manufacturers to remove all certification labels and product labels indicating compliance with the 2007 edition of this standard from all SCBA that are under the control of the manufacturer on ~~31 August 2013~~ 28 February 2014. The certification organization shall verify that this action is taken.

Submitter's Substantiation: The purpose of this TIA is to update on the National Institute for Occupational Safety and Health (NIOSH) testing of CBRN SCBAs. Some unanticipated delays have the potential to negatively impact the timeliness of completion of NIOSH SCBA approvals. These delays could in turn impact approvals and certification of SCBAs by the relevant certification organization (SEI) to the NFPA 1981 standard, 2013 edition. That standard states in paragraph 4.1.11 that "The certification organizations shall not permit any manufacturer to label any SCBA as compliant with the 2007 edition of this standard on or after 31 August 2013, except when replacement labels or replacement components that bear the certification organization's label are required." The presumption in the Technical Committee choosing this date was that it would provide sufficient time for manufacturers' new designs to have successfully completed the evaluations for the certification authorities to be able to issue certifications for compliance to the NIOSH and NFPA standards by that date.

Emergency Nature: NIOSH testing to the Statement of Standard for Self Contained Breathing Apparatus (SCBA) with Chemical, Biological, Radiological, and Nuclear (CBRN) Protection used to Protect Emergency Responders Against CBRN Agents in Terrorist Attacks in conjunction with the National Fire Protection Association (NFPA) Standard 1981 for Open-Circuit Self-Contained Breathing Apparatus for Fire Fighters contain three interlocked activities. One is NIOSH certification under 42 CFR Part 84, Subpart H; two is compliance with National Fire Protection Association (NFPA) Standard 1981 for Open-Circuit Self-Contained Breathing Apparatus for Fire Fighters, current edition; and three is special tests under NIOSH 42 CFR 84.63(c): Chemical Agent Permeation and Penetration Resistance Against Distilled Sulfur Mustard (HD) and Sarin (GB), performed by The US Army Edgewood Chemical Biological Center (ECBC) Testing Center and Laboratory Respirator Protection Level (LRPL), performed by NPPTL. To minimize the total time for CBRN approvals, NIOSH and SEI have a simultaneous test and approval protocol.

The National Personal Protective Technology Laboratory (NPPTL) has allocated its resources provide for the completion of all 9 internally-conducted tests, evaluations and issuance of approvals for SCBA manufacturer applications submitted prior to 1 June 2013 by September 1st. SEI has also allocated resources to provide for completion of the NFPA 1981 compliance testing for apparatus received by the same date.

However, the availability of ECBC testing resources to complete the HD and GB testing has been negatively impacted by the Federal Government Budget Sequestration. Consequently, delays are anticipated. Representatives from NPPTL and ECBC are working closely to develop a projected testing schedule.

A delay past the August 31st date poses a significant impact on fire departments or first responder organizations that planned 4th quarter of 2013 purchases or need an emergency purchase of compliant SCBA. These organizations may not have access to the manufacturer of their current inventory SCBA, posing the dilemma of

purchasing another manufacturers product or foregoing purchase until compliant product is available. Either of these approaches will impact firefighter safety, by requiring additional training and creating a mixed inventory of SCBA with compromised interoperability of SCBA units. Departments may be faced with either an inadequate number of compliant SCBAs for operations or sending responders into a hazardous situation with safety equipment that is no longer compliant with NFPA 1981. Additionally, there is concern that without this compliance date extension, products compliant to the 2007 edition of NFPA 1981 will no longer be available after August 31, 2013.

NFPA 1982- 2013

Standard on Personal Alert Safety Systems (PASS)

TIA Log No. 1112

Reference: 4.1.8 and 4.1.9

Comment Closing Date: August 12, 2013

Submitter: Dan Rossos, Oregon Department of Public Safety Standards & Training; Bill Haskell, NIOSH/NPPTL; Robert Athanas, FDNY

1. Revise 4.1.8 and 4.1.9 to read as follows:

4.1.8 The certification organization shall not permit any manufacturer to label any PASS as compliant with the 2007 edition of this standard on or after ~~August 31, 2013~~ February 28, 2014.

4.1.9 The certification organization shall require manufacturers to remove all certification labels and product labels indicating compliance with the 2007 edition of this standard from all PASS that are under the control of the manufacturer on ~~August 31, 2013~~ February 28, 2014. The certification organization shall verify this action is taken.

Submitter's Substantiation: This TIA is related to a similar TIA being submitted to NFPA 1981. The testing and certification of an integrated PASS device is directly related to the testing and certification of the SCBA. The submitters emphasize the importance of the two documents continuing to have the same compliance dates.

The purpose of this TIA is to update on the National Institute for Occupational Safety and Health (NIOSH) testing of CBRN SCBAs. Some unanticipated delays have the potential to negatively impact the timeliness of completion of NIOSH SCBA approvals. The Importance of Earthquake Protection for Sprinkler Systems

With the 2013 edition of NFPA 13, *Installation of Sprinkler Systems*, fresh on the streets, one of the most frequent questions is, "Do I still need to do all of that confusing seismic protection?" Of all the requirements in NFPA 13, the ones addressing earthquake protection of automatic sprinkler systems are considered to be the most challenging to understand. [Read more](#)

Earlier Closing Dates for Paper Submission of Public Input and Comments

As NFPA continues to move forward with implementation of the Standards Development Process, many of the new benefits of online submission process continue to take hold. When Public Input/Comments are submitted online the proposed changes are integrated in-line on the draft document. Once the closing date has passed, online submissions allow the Committee Members to see all of the proposed changes integrated into one complete document virtually immediately, maximize the amount of time each Committee Member has to review all of the proposed changes and prepare for any upcoming committee meeting. However, while we want to provide as much extra time as possible to our Committee Members, we also want to consider the needs of those who still want to submit their Public Input/Comments on the "paper forms" via e-mail, fax or mail. Beginning with the Fall 2014 submittals of Public Comments, we have implemented an earlier closing date for "paper submissions" of Public Input/Comments. The earlier closing date will allow the necessary time to key and proof any proposed change, to ensure the changes are presented for Committee consideration at the same time as the changes submitted online.

Paper Submission Closing Dates. The closing date for paper submissions, (this includes forms sent via e-mail, fax or mail), for the Fall 2014 comments will be October 11, 2013 and the closing date for the electronic submission system will be November 15, 2013. All revised schedules can be located on the respective document information page or www.nfpa.org/schedules.

Please be advised, it is anticipated that in the future, "paper submissions" will not be accepted so please take this opportunity to try out the new system – we think you'll really like it! As always we are here to help you participate in the NFPA process. If you have any questions or concerns please contact us at 617-984-7240 or via email at standardsdev_support@nfpa.org.
