Scope
This Committee shall have the primary responsibility for documents relating to preventive maintenance of electrical, electronic, and communications systems and equipment used in industrial and commercial type applications with the view of: (1) reducing loss of life and property, and (2) improving reliability, performance, and efficiency in a cost-effective manner. The purpose is to provide generally applicable procedures for preventive maintenance that have broad application to the more common classes of industrial and commercial systems and equipment without duplicating or superseding instructions that manufacturers normally provide. This Committee shall report to Correlating Committee of the National Electrical Code.

Responsibility
Recommended Practice for Electrical Equipment Maintenance (NFPA 70B)

Electrical Inspection Practices
EEP-AAA Technical Committee
Staff Liaison Gil Moniz
Scope
This Committee shall have primary responsibility for documents on the requirements for professional qualifications, professional competence, training, procedures, and equipment for electrical inspections and electrical plans examinations.

Scope
This Committee shall have primary responsibility for documents on
performance criteria for the selection and assembly of the
components for emergency and standby power systems in buildings
and facilities, including categories of power supplies, transfer
equipment, controls, supervisory equipment, and all related
electrical and mechanical auxiliary or accessory equipment needed
to supply emergency or standby power to the utilization equipment.
The Committee also shall be responsible for criteria on the
maintenance and testing of the system. This Committee does not
cover requirements for the application of emergency power
systems, self-contained emergency lighting units, and electrical
wiring, except that wiring that is an integral part of the system up to
the load side of the transfer switch(es). This Committee shall report
to Technical Correlating Committee of the National Electrical
Code.

Scope
This Committee shall have primary responsibility for documents on safety code for gas piping systems on consumers' premises and the installation of gas utilization equipment and accessories for use with fuel gases such as natural gas, manufactured gas, liquefied petroleum gas in the vapor phase, liquefied petroleum gas-air mixtures, or mixtures of these gases, including:

a. The design, fabrication, installation, testing, operation, and maintenance of gas piping systems from the point of delivery to the connections with each gas utilization device. Piping systems covered by this Code are limited to a maximum operating pressure of 125 psig. For purposes of this Code, the point of delivery is defined as the outlet of the meter set assembly, or the outlet of the service regulator or service shutoff valve where no meter is provided.

b. The installation of gas utilization equipment, related accessories, and their ventilation and venting systems.
