SUMMARY: This notice seeks information and invites public comment regarding how HUD can best continue to support the implementation of smoke-free policies for both public housing and multifamily housing. In this regard, HUD is seeking information from the general public and stakeholders, including resident councils, advocacy groups, and housing providers, directly impacted by or involved with the implementation of smoke-free policies in both public housing and multifamily programs. Specifically, HUD is seeking information on best practices and practical strategies from housing providers who have implemented smoke-free policies, ideas for overcoming potential obstacles to implementing a smoke-free policy and methods for supporting residents, and housing providers in transitioning to smoke-free housing. Additionally, this notice requests input from housing providers that have decided not to implement a smoke-free policy and those impacted by that decision. This information will assist HUD to develop and disseminate additional guidance and resources to support public housing agencies (PHAs) and owners and management agents (O/As) who wish to implement smoke-free policies.

SUPPLEMENTARY INFORMATION:

I. Background

In 2009, HUD issued PIH Notice 2009-21¹ in which it strongly encouraged PHAs to adopt smoke-free policies in some or all of their public housing units. In 2010, HUD issued Housing Notice 2010-21² in which it encouraged O/As to implement smoke-free housing policies in one or all of the properties they own or manage. Both notices stated that cigarette smoking is the number one cause of preventable disease in the United States and that secondhand smoke, also known as environmental tobacco smoke (ETS) and which may be involuntarily inhaled by nonsmokers, can migrate between units in multifamily properties, and cause respiratory illness, heart disease, cancer, and other adverse health effects for housing residents and employees. The notices also referenced studies that reviewed smoking-material fires and that concluded that smoking is the leading cause of fire deaths in multifamily properties.³

PIH Notice 2009-21 also referenced a case study produced by the Sanford Maine Housing Authority that concluded that smoke-free units are less expensive to turn over for new residents, due to a lack of damage to carpets, stains on walls and damage to other interior spaces and finishes caused by smoke and burn marks.⁴ PHAs and O/As may also be able to negotiate for reduced insurance rates based on decreased fire risks in smoke-free buildings, increasing the potential savings from instituting smoke-free policies.

As of January 2011, over 225 PHAs have adopted smoke-free policies in some or all of their units. HUD has also received a substantial amount of correspondence from residents, PHAs, O/As, governmental agencies and advocacy groups requesting additional guidance on how housing providers can implement smoke-free policies.
