Complete Listing of NFPA Technical Committee Members, Correlating Committee Members and Panel Members

Last Revised – August 2023
Cross Functional Emergency Preparedness and Response

Responsibility
Standard for an Active Shooter/Hostile Event (NFPA 3000)

Scope
This Committee shall have primary responsibility for documents relating to the preparedness, planning and response to cross functional, multi-discipline, and cross coordinated emergency events that are not already established by the NFPA. This includes all documents that establish criteria for the professional qualifications of those who are responsible for preparation, planning, exercising, and responding to cross functional, cross jurisdictional events.

ACT-AAA Technical Committee
Staff Liaison Nicole Cassels

Chair
Julie Downey E
Davie Fire Rescue Department Fire Chief
6901 Orange Drive
Fire Administration
Davie, FL 33314

Scope
This Committee shall have primary responsibility for documents on the design and installation of automatic sprinkler systems in dwellings and residential occupancies up to and including four stories in height, including the character and adequacy of water supplies, and the selection of sprinklers, piping, valves, and all materials and accessories. In addition, this Committee shall have primary responsibility of inspection, testing, and maintenance requirements for sprinkler systems installed in one-and two-family dwellings and manufactured homes.

Responsibility
Standard for the Installation of Sprinkler Systems in Low-Rise Residential Occupancies (NFPA 13R)
Standard for the Installation of Sprinkler Systems in One- and Two-Family Dwellings and Manufactured Homes (NFPA 13D)

Scope
This Committee shall have primary responsibility for documents on
the operation and reduction of combustion system hazards and the
prevention of boiler furnace explosions of fluidized-bed boilers.
This includes all fuels at any heat input rate.

Responsibility
Boiler and Combustion Systems Hazards Code (NFPA 85)

Fundamentals of Combustion Systems Hazards
BCS-FUN Technical Committee
Staff Liaison Heath Dehn

Scope
This Committee shall have primary responsibility for documents on
the reduction of combustion system hazards in single-burner
boilers, multiple-burner boilers, and stoker-fired boilers with a heat
input rate of 12,500,000 Btu/hr and above. This includes all fuels.
This Committee also is responsible for documents on the reduction
of hazards in pulverized fuel systems, fluidized-bed boilers, and
heat recovery steam generators and other combustion turbine
exhaust systems at any heat input rate.

Responsibility

Scope
This Committee shall have primary responsibility for documents
that address commissioning and integrated system testing activities
and tasks for fire protection and life safety systems. This includes
the requirements for planning, organization, coordination,
responsibility, implementation, and documentation of
commissioning and integrated system testing of active and passive
systems and features that serve a fire protection or life safety
purpose.

Responsibility

Scope
This Committee shall have the primary responsibility for documents relating to preventive maintenance of electrical, electronic, and communications systems and equipment used in industrial and commercial type applications with the view of: (1) reducing loss of life and property, and (2) improving reliability, performance, and efficiency in a cost-effective manner. The purpose is to provide generally applicable procedures for preventive maintenance that have broad application to the more common classes of industrial and commercial systems and equipment without duplicating or superseding instructions that manufacturers normally provide. This Committee shall report to Correlating Committee of the National Electrical Code.

Scope
This Committee shall have primary responsibility for documents on performance criteria for the selection and assembly of the components for emergency power systems in buildings and facilities, including categories of power supplies, transfer equipment, controls, supervisory equipment, and all related electrical and mechanical auxiliary or accessory equipment needed to supply emergency power to the utilization equipment. The Committee also shall be responsible for criteria on the maintenance and testing of the system. This Committee does not cover requirements for the application of emergency power systems, self-contained emergency lighting units, and electrical wiring, except that wiring that is an integral part of the system up to the load side of the transfer switch(es). This Committee shall report to the Correlating Committee of the National Electrical Code.

Responsibility
Standard for Emergency and Standby Power Systems (NFPA 110)
Standard on Stored Electrical Energy Emergency and Standby Power Systems (NFPA 111)

### Scope
This Committee shall have primary responsibility for documents on protective clothing and protective equipment, except respiratory protective equipment, that provides hand, torso, limb, and face protection for firefighters or other emergency services responders during incidents that involve emergency medical operations. These operations include first aid, cardiopulmonary resuscitation, basic life support, advanced life support, and other medical procedures provided to patients prior to arrival at a hospital or other health care facility.

Additionally, this Committee shall have primary responsibility for documents on the selection, care, and maintenance of emergency medical protective clothing and protective equipment by fire and emergency services organizations and personnel.

### Responsibility
- Standard for Protective Ensembles for Hazardous Materials and CBRN Operations (NFPA 1990)
- Standard on Protective Clothing and Ensembles for Emergency Medical Operations (NFPA 1999)

### Hazardous Materials Protective Clothing and Equipment

**Scope**
This Committee shall have primary responsibility for documents on protective clothing and protective equipment, except respiratory protective equipment, that provides hand, foot, torso, limb, and head protection for firefighters and other emergency services responders during incidents that involve hazardous materials operations. These operations involve the activities of rescue; hazardous material confinement, containment, and mitigation; and property conservation where exposure to substances that present an unusual danger to responders are present or could occur due to toxicity, chemical reactivity, decomposition, corrosiveness, or similar reactions.

Additionally, this Committee shall have primary responsibility for documents on the selection, care, and maintenance of hazardous materials protective clothing and protective equipment by fire and emergency services organizations and personnel.

**Responsibility**
- Standard for Protective Ensembles for Hazardous Materials and CBRN Operations (NFPA 1990)
- Standard on Selection, Care, and Maintenance of Hazardous Materials Clothing and Equipment (NFPA 1891)
- Standard on Vapor-Protective Ensembles for Hazardous Materials Emergencies and CBRN Terrorism Incidents (NFPA 1991)

Scope
This Committee shall have primary responsibility for documents on special operations protective clothing and protective equipment, except respiratory equipment, that provides hand, foot, torso, limb, head, and interface protection for firefighters and other emergency services responders during incidents involving special operations functions including, but not limited to, structural collapse, trench rescue, confined space entry, urban search and rescue, high angle/mountain rescue, vehicular extraction, swift water or flooding rescue, contaminated water diving, and air operations.

This Committee shall also have primary responsibility for documents on station/work uniform garments that are not of themselves primary protective garments but can be combined with a primary protective garment to serve dual or multiple functions.

Additionally, this Committee shall have primary responsibility for documents on the selection, care, and maintenance of special operations protective clothing and equipment by fire and emergency services organizations and personnel.

Responsibility
(NFPA 1858)
Standard on Emergency Services Work Apparel (NFPA 1975)
Standard on Life Safety Rope and Equipment for Emergency Services (NFPA 1983)
Standard on Protective Ensembles for Contaminated Water Diving (NFPA 1953)

Scope
This Committee shall have primary responsibility for documents on protective ensembles, except respiratory protection, that provides head, limb, hand, foot, torso, and interface protection for firefighters and other emergency services responders during incidents involving structural firefighting operations or proximity firefighting operations.

Structural firefighting operations include the activities of rescue, fire suppression, and property conservation during incidents involving fires in buildings, enclosed structures, vehicles, marine vessels, or like properties.

Proximity firefighting operations include the activities of rescue, fire suppression, and property conservation during incidents involving commercial and military aircraft fires, bulk flammable gas fires, bulk flammable and combustible liquids fires, combustible metal fires, exotic fuel fires, and other such fires that produce very high levels of radiant heat as well as convective and conductive heat.

Additionally, this Committee shall have primary responsibility for documents on the selection, care, and maintenance of structural and proximity firefighting protective ensembles by fire and emergency services organizations and personnel.

Responsibility
Standard on Protective Ensembles for Structural and Proximity
Standard on Protective Ensembles for Structural Fire Fighting and Proximity Fire Fighting (NFPA 1971)
Standard on Selection, Care, and Maintenance of Protective Ensembles for Structural Fire Fighting and Proximity Fire Fighting (NFPA 1851)

**Scope**

This Committee shall have primary responsibility for documents on protective clothing and protective equipment, except respiratory protective equipment, that provides hand, foot, torso, limb, and head protection, as well as interface protection for firefighters or other emergency services responders during incidents involving wildland firefighting operations. These operations include the activities of fire suppression and property conservation in forest, brush, grass, ground cover, and other such vegetation that is not within structures but that is involved in fire.

Additionally, this Committee shall have primary responsibility for documents on the selection, care, and maintenance of wildland firefighting protective clothing and protective equipment by fire and emergency services organizations and personnel.

**Responsibility**

- **Standard on Protective Clothing and Equipment for Wildland Fire Fighting and Urban Interface Fire Fighting (NFPA 1977)**
- **Standard on Selection, Care, and Maintenance of Wildland Fire Fighting Protective Clothing and Equipment (NFPA 1877)**

**Fire Code**

- **FCC-AAC Correlating Committee**

Scope
This committee shall have primary responsibility for documents on a Fire Prevention Code that includes appropriate administrative provisions, to be used with the National Fire Codes for the installation, operation, and maintenance of buildings, structures, and premises for the purpose of providing safety to life and property from fire and explosion. This includes development of requirements for, and maintenance of, systems and equipment for fire control and extinguishment. Safety to life of occupants of buildings and structures is under the primary jurisdiction of the Committee on Safety to Life.

Scope
This Committee shall have primary responsibility for all fire service training techniques, operations, and procedures to develop maximum efficiency and proper utilization of available personnel. Such activities can include training guides for fire prevention, fire suppression, and other missions for which the fire service has responsibility.

Responsibility
Guide for Land-Based Fire Departments that Respond to Marine Vessel Fires (NFPA 1405)
Recommended Practice for Fire Department Operations in Properties Protected by Sprinkler and Standpipe Systems (NFPA 13E)
Recommended Practice for Fire Service Training Reports and Records (NFPA 1401)
Standard for Training Fire Service Rapid Intervention Crews (NFPA 1407)
Standard for a Fire and Emergency Service Vehicle Operations Training Program (NFPA 1451)
Standard for Fire Service Respiratory Protection Training (NFPA 1404)
Standard for Training Fire Service Personnel in the Operation, Care, Use, and Maintenance of Thermal Imagers (NFPA 1408)
Standard on Live Fire Training Evolutions (NFPA 1403)
Standard on Training for Emergency Scene Operations (NFPA 1410)

Scope
This Committee shall have primary responsibility for documents on fire testing procedures, for reviewing existing fire test standards and recommending appropriate action to NFPA, for recommending the application of and advising on the interpretation of acceptable test standards for fire problems of concern to NFPA technical committees and members, and for acting in a liaison capacity between NFPA and the committees of other organizations writing fire test standards. This Committee does not cover fire tests that are used to evaluate extinguishing agents, devices, or systems.

Responsibility
Recommended Practice for a Field Flame Test for Textiles and Films (NFPA 705)
Recommended Practice for Determining Smoke Generation of Solid Materials (NFPA 258)
Standard for Fire Testing of Passive Protection Materials for Use on LP-Gas Containers (NFPA 290)
Standard Method of Fire Test for Determining the Heat Release Rate of Roofing Assemblies with Combustible Above-Deck Roofing Components (NFPA 276)
Standard Method of Fire Test for Individual Fuel Packages (NFPA 289)
Standard Method of Fire Tests for the Evaluation of Thermal Barriers (NFPA 275)
Standard Method of Test for Critical Radiant Flux of Floor Covering Systems Using a Radiant Heat Energy Source (NFPA 253)
Standard Method of Test for Determining Resistance of Mock-Up Upholstered Furniture Material Assemblies to Ignition by Smoldering Cigarettes (NFPA 261)
Standard Method of Test for Flame Travel and Smoke of Wires and Cables for Use in Air-Handling Spaces (NFPA 262)
Standard Methods of Fire Tests for Evaluating Contribution of Wall and Ceiling Interior Finish to Room Fire Growth (NFPA 286)
Standard Methods of Fire Tests for Determining Room Fire Growth Contribution of Textile or Expanded Vinyl Wall Coverings on Full Height Panels and Walls (NFPA 265)
Standard Methods of Fire Tests for Flame Propagation of Textiles and Films (NFPA 701)
Standard Methods of Fire Tests of Door Assemblies (NFPA 252)
Standard Methods of Fire Tests of Horizontal Fire Door Assemblies Installed in Horizontal Fire Resistance-Rated Assemblies (NFPA 288)
Standard Methods of Tests and Classification System for Cigarette Ignition Resistance of Components of Upholstered Furniture (NFPA 260)
Standard Methods of Tests for Evaluating Fire and Ignition Resistance of Upholstered Furniture Using a Flaming Ignition Source (NFPA 277)
Standard on Fire Test for Window and Glass Block Assemblies (NFPA 257)
Standard Test Method for Developing Toxic Potency Data for Use in Fire Hazard Modeling (NFPA 269)
Standard Test Method for Mattresses for Correctional Occupancies (NFPA 284)
Standard Test Method for Measurement of Smoke Obscuration Using a Conical Radiant Source in a Single Closed Chamber (NFPA 270)
Standard Test Method to Evaluate Fire Performance Characteristics of Pipe Insulation (NFPA 274)

Scope
This Committee shall have primary responsibility for documents on the manufacture, selection, care, and use of garments and equipment used for protection of industrial personnel where there is potential for flash fire. Industrial personnel include workers who are potentially or may accidentally be exposed to hydrocarbon or combustible dust flash fires, and not electrical flashes. These documents do not cover fire fighters and other emergency services personnel.

Responsibility
- Standard on Flame-Resistant Clothing for Protection of Industrial Personnel Against Short-Duration Thermal Exposures from Fire (NFPA 2112)
- Standard on Selection, Care, Use, and Maintenance of Flame-Resistant Garments for Protection of Industrial Personnel Against Short-Duration Thermal Exposures from Fire (NFPA 2113)

### Scope

This committee shall have primary responsibility for documents on the installation, maintenance, and use of carbon dioxide systems for fire protection.

This committee shall also have primary responsibility for documents on fixed fire extinguishing systems utilizing bromotrifluoromethane and other similar halogenated extinguishing agents, covering the installation, maintenance, and use of systems.

This committee shall also have primary responsibility for documents on alternative protection options to Halon 1301 and 1211 fire extinguishing systems. It shall not deal with design, installation, operation, testing, and maintenance of systems employing dry chemical, wet chemical, foam, aerosols, or water as the primary extinguishing media.

### Responsibility

- Standard on Carbon Dioxide Extinguishing Systems (NFPA 12)
- Standard on Clean Agent Fire Extinguishing Systems (NFPA 2001)
- Standard on Halon 1301 Fire Extinguishing Systems (NFPA 12A)

**Scope**

This committee shall have primary responsibility for documents covering the design, installation, operation, and maintenance of hybrid (water and inert gas) fire extinguishing systems that use a combination of atomized water and inert gas to extinguish fire. This scope does not include systems that use only inert gas or only atomized water (water mist) to achieve extinguishment. It also does not include twin fluid water mist systems that use inert gas to propel and/or atomize water mist droplets without generating a significant inert gas concentration in the protected space.

Scope
This Committee shall have primary responsibility for documents on
the safeguarding against the fire, explosion, and life safety hazards
associated with the installation and use of stationary and portable
liquid fuel-burning equipment, including: (1) related fuel storage
tanks and associated piping, venting systems, pumps, and controls;
(2) the combustion air supply and flue gas venting systems for the
liquid fuel burning equipment; and (3) combustion and safety
controls.

This Committee does not have responsibility for: (1) boiler-
furnaces with fuel input ratings of 3660 kW (12,500,000 BTU per
hr. or 10,000 lbs. steam per hr.) or more; (2) process ovens; (3)
process furnaces; or (4) internal combustion engines.

Responsibility
Standard for the Installation of Oil-Burning Equipment (NFPA 31)

Scope
This Committee shall have primary responsibility for documents on safety code for gas piping systems on consumers' premises and the installation of gas utilization equipment and accessories for use with fuel gases such as natural gas, manufactured gas, liquefied petroleum gas in the vapor phase, liquefied petroleum gas-air mixtures, or mixtures of these gases, including: a) The design, fabrication, installation, testing, operation, and maintenance of gas piping systems from the point of delivery to the connections with each gas utilization device. Piping systems covered by this Code are limited to a maximum operating pressure of 125 psig. For purposes of this Code, the point of delivery is defined as the outlet of the meter set assembly, or the outlet of the service regulator or service shutoff valve where no meter is provided. b) The installation of gas utilization equipment, related accessories, and their ventilation and venting systems.

Occupational Safety & Health Administration

Scope
This Committee shall have primary responsibility for documents on the manufacture, transportation, and storage of consumer and display fireworks, pyrotechnic special effects, and model and high power rocket motors. This Committee shall have primary responsibility for the use of display fireworks and for model and high power rocketry, and the construction, launching, and other operations that involve model and high power rocket motors.

The Committee does not have responsibility for documents on the storage and retail sales of consumer fireworks or the use of consumer fireworks by the general public; on the use of pyrotechnic special effects before a proximate audience; on the manufacture, transportation, storage for use of military, automotive, agricultural, and industrial pyrotechnics.

Responsibility
- Code for Model Rocketry (NFPA 1122)
- Code for Fireworks Display (NFPA 1123)
- Code for High Power Rocketry (NFPA 1127)
- Code for the Manufacture of Model Rocket and High-Power Rocket Motors (NFPA 1125)
- Code for the Manufacture, Transportation, and Storage of Fireworks and Pyrotechnic Articles (NFPA 1124)

Scope
This committee shall have primary responsibility for documents on the risk analysis, design, application, installation, and performance of emergency communications systems and their components. Public emergency services communications systems covered by NFPA 1221 are outside the scope of this committee except where they interface with in-building bi-directional amplifiers and where trouble and supervisory signals are intended to be monitored by the building fire alarm system.
