Scope
This Committee shall have primary responsibility for documents on safeguarding against the fire and explosion hazards associated with the general storage, handling, and dispensing of flammable and combustible liquids at automotive and marine service stations, farms, and isolated construction sites and with related activities such as dispensing gaseous fuels.

This Committee shall also have primary responsibility for documents on construction, control of fire hazards, ventilations, fire protection, and maintenance of repair garages.

Responsibility
Code for Motor Fuel Dispensing Facilities and Repair Garages (NFPA 30A)

Boiler Combustion System Hazards
BCS-AAC Technical Correlating Committee
Staff Liaison Heath Dehn
Scope
This Committee shall have primary responsibility for documents on the reduction of combustion system hazards in single-burner boilers, multiple-burner boilers, and stoker-fired boilers with a heat input rate of 12,500,000 Btu/hr and above. This includes all fuels. This Committee also is responsible for documents on the reduction of hazards in pulverized fuel systems, fluidized-bed boilers, and heat recovery steam generators and other combustion turbine exhaust systems at any heat input rate.

Responsibility
Boiler and Combustion Systems Hazards Code (NFPA 85)

Fluidized Bed Boilers

Scope
This committee shall have primary responsibility for documents on the selection and design of types of building construction, exterior walls, building height and area, firewalls, and fire barrier walls, as they relate to the protection of life and property from fire. For the processing of NFPA 5000, Chapter 7, and Sections 8.3 and 8.4, this committee reports directly to the NFPA 5000 Correlating Committee; whereas, for the processing of NFPA 220 and NFPA 221, this committee does not report to the NFPA 5000 Correlating Committee.

Responsibility

Scope
This Committee shall have primary responsibility for documents on
(1) developing data on the properties of chemicals enabling proper
selection of electrical equipment for use in atmospheres containing
flammable gases, vapors or dusts; (2) making recommendations for
the prevention of fires and explosions through the use of
continuously purged, pressurized, explosion-proof, or dust-ignition-
proof electrical equipment where installed in such chemical
atmospheres.

Responsibility
Recommended Practice for the Classification of Combustible Dusts and of
Hazardous (Classified) Locations for Electrical Installations in Chemical
Process Areas (NFPA 499)
Recommended Practice for the Classification of Flammable Liquids, Gases,
or Vapors and of Hazardous (Classified) Locations for Electrical

Scope
This Committee shall have the primary responsibility for documents relating to preventive maintenance of electrical, electronic, and communications systems and equipment used in industrial and commercial type applications with the view of: (1) reducing loss of life and property, and (2) improving reliability, performance, and efficiency in a cost-effective manner. The purpose is to provide generally applicable procedures for preventive maintenance that have broad application to the more common classes of industrial and commercial systems and equipment without duplicating or superseding instructions that manufacturers normally provide. This Committee shall report to Correlating Committee of the National Electrical Code.

Responsibility

Scope
This Committee shall have primary responsibility for documents on performance criteria for the selection and assembly of the components for emergency power systems in buildings and facilities, including categories of power supplies, transfer equipment, controls, supervisory equipment, and all related electrical and mechanical auxiliary or accessory equipment needed to supply emergency power to the utilization equipment. The Committee also shall be responsible for criteria on the maintenance and testing of the system. This Committee does not cover requirements for the application of emergency power systems, self-contained emergency lighting units, and electrical wiring, except that wiring that is an integral part of the system up to the load side of the transfer switch(es). This Committee shall report to Correlating Committee of the National Electrical Code.

**Scope**

This Committee shall have primary responsibility for documents on protective clothing and protective equipment, except respiratory protective equipment, that provides hand, foot, torso, limb, and head protection for firefighters and other emergency services responders during incidents that involve hazardous materials operations. These operations involve the activities of rescue; hazardous material confinement, containment, and mitigation; and property conservation where exposure to substances that present an unusual danger to responders are present or could occur due to toxicity, chemical reactivity, decomposition, corrosiveness, or similar reactions.

Additionally, this Committee shall have primary responsibility for documents on the selection, care, and maintenance of hazardous materials protective clothing and protective equipment by fire and emergency services organizations and personnel.

**Responsibility**

- Standard on Selection, Care, and Maintenance of Hazardous Materials Clothing and Equipment (NFPA 1891)
- Standard on Vapor-Protective Ensembles for Hazardous Materials Emergencies and CBRN Terrorism Incidents (NFPA 1991)
- Standards for Protective Ensembles for Hazardous Material and Emergency Medical Operations (NFPA 1990)

Staff Liaison

Chris Farrell
National Fire Protection Association
One Batterymarch Park
Quincy, MA 02169-7471
Scope
This Committee shall have primary responsibility for documents on special operations protective clothing and protective equipment, except respiratory equipment, that provides hand, foot, torso, limb, head, and interface protection for firefighters and other emergency services responders during incidents involving special operations functions including, but not limited to, structural collapse, trench rescue, confined space entry, urban search and rescue, high angle/mountain rescue, vehicular extraction, swift water or flooding rescue, contaminated water diving, and air operations.

This Committee shall also have primary responsibility for documents on station/work uniform garments that are not of themselves primary protective garments but can be combined with a primary protective garment to serve dual or multiple functions.

Additionally, this Committee shall have primary responsibility for documents on the selection, care, and maintenance of special operations protective clothing and equipment by fire and emergency services organizations and personnel.

Responsibility
(NFPA 1858)
Standard on Emergency Services Work Apparel (NFPA 1975)
Standard on Life Safety Rope and Equipment for Emergency Services (NFPA 1983)
Standard on Protective Ensembles for Contaminated Water Diving (NFPA 1953)
Standard on Protective Ensembles for Technical Rescue Incidents (NFPA 1951)
Standard on Selection, Care, and Maintenance of Life Safety Rope and Equipment for Emergency Services
Standard on Selection, Care, and Maintenance of Protective Ensembles for Technical Rescue Incidents (NFPA 1855)
Standard on Surface Water Operations Protective Clothing and Equipment (NFPA 1952)
Standards for Operations and Training for Technical Search and Rescue Incidents and Life Safety Rope and Equipment for Emergency Services (NFPA 2500)

Scope
This Committee shall have primary responsibility for documents on protective ensembles, except respiratory protection, that provides head, limb, hand, foot, torso, and interface protection for firefighters and other emergency services responders during incidents involving structural firefighting operations or proximity firefighting operations.

Structural firefighting operations include the activities of rescue, fire suppression, and property conservation during incidents involving fires in buildings, enclosed structures, vehicles, marine vessels, or like properties.

Proximity firefighting operations include the activities of rescue, fire suppression, and property conservation during incidents involving commercial and military aircraft fires, bulk flammable gas fires, bulk flammable and combustible liquids fires, combustible metal fires, exotic fuel fires, and other such fires that produce very high levels of radiant heat as well as convective and conductive heat.

Additionally, this Committee shall have primary responsibility for documents on the selection, care, and maintenance of structural and proximity firefighting protective ensembles by fire and emergency services organizations and personnel.

Responsibility
Standard on Protective Ensembles for Structural Fire Fighting and Proximity Fire Fighting (NFPA 1971)

Scope
This Committee shall have primary responsibility for documents on protective clothing and protective equipment, except respiratory protective equipment, that provides hand, foot, torso, limb, and head protection, as well as interface protection for firefighters or other emergency services responders during incidents involving wildland firefighting operations. These operations include the activities of fire suppression and property conservation in forest, brush, grass, ground cover, and other such vegetation that is not within structures but that is involved in fire.

Additionally, this Committee shall have primary responsibility for documents on the selection, care, and maintenance of wildland firefighting protective clothing and protective equipment by fire and emergency services organizations and personnel.

Responsibility
Standard on Protective Clothing and Equipment for Wildland Fire Fighting and Urban Interface Fire Fighting (NFPA 1977)
Standard on Selection, Care, and Maintenance of Wildland Fire Fighting Protective Clothing and Equipment (NFPA 1877)

Scope
This committee shall have primary responsibility for documents on a Fire Prevention Code that includes appropriate administrative provisions, to be used with the National Fire Codes for the installation, operation, and maintenance of buildings, structures, and premises for the purpose of providing safety to life and property from fire and explosion. This includes development of requirements for, and maintenance of, systems and equipment for fire control and extinguishment. Safety to life of occupants of buildings and structures is under the primary jurisdiction of the Committee on Safety to Life.

National Fire Protection Association  
One Batterymarch Park  
Quincy, MA 02169-7471

**Scope**  
This Committee shall have primary responsibility for documents on  
fire testing procedures, for reviewing existing fire test standards and  
recommending appropriate action to NFPA, for recommending the  
application of and advising on the interpretation of acceptable test  
standards for fire problems of concern to NFPA technical  
committees and members, and for acting in a liaison capacity  
between NFPA and the committees of other organizations writing  
fire test standards. This Committee does not cover fire tests that are  
used to evaluate extinguishing agents, devices, or systems.

**Responsibility**

Recommended Practice for a Field Flame Test for Textiles and Films  
(NFPA 705)  
Recommended Practice for Determining Smoke Generation of Solid  
Materials (NFPA 258)  
Standard Fire Test Method for Evaluation of Fire Propagation  
Characteristics of Exterior Wall Assemblies Containing Combustible  
Components (NFPA 285)  
Standard for Fire Testing of Passive Protection Materials for Use on LP-Gas  
Containers (NFPA 290)  
Standard Method of Fire Test for Determining the Heat Release Rate of  
Roofing Assemblies with Combustible Above-Deck Roofing Components  
(NFPA 276)  
Standard Method of Fire Test for Individual Fuel Packages (NFPA 289)  
Standard Method of Fire Tests for the Evaluation of Thermal Barriers  
(NFPA 275)  
Standard Method of Test for Critical Radiant Flux of Floor Covering  
Systems Using a Radiant Heat Energy Source (NFPA 253)  
Standard Method of Test for Determining Resistance of Mock-Up  
Upholstered Furniture Material Assemblies to Ignition by Smoldering  
Cigarettes (NFPA 261)  
Standard Method of Test for Flame Travel and Smoke of Wires and Cables  
for Use in Air-Handling Spaces (NFPA 262)  
Standard Methods of Fire Tests for Evaluating Contribution of Wall and  
Ceiling Interior Finish to Room Fire Growth (NFPA 286)  
Standard Methods of Fire Tests for Evaluating Room Fire Growth  
Contribution of Textile or Expanded Vinyl Wall Coverings on Full Height  
Panels and Walls (NFPA 265)  
Standard Methods of Fire Tests for Flame Propagation of Textiles and Films  
(NFPA 701)  
Standard Methods of Fire Tests of Door Assemblies (NFPA 252)  
Standard Methods of Fire Tests of Horizontal Fire Door Assemblies  
Installed in Horizontal Fire Resistance-Rated Assemblies (NFPA 288)  
Standard Methods of Tests and Classification System for Cigarette Ignition  
Resistance of Components of Upholstered Furniture (NFPA 260)  
Standard Methods of Tests for Evaluating Fire and Ignition Resistance of  
Upholstered Furniture Using a Flaming Ignition Source (NFPA 277)  
Standard on Fire Test for Window and Glass Block Assemblies (NFPA 257)  
Standard Test Method for Determining Ignitibility of Exterior Wall  
Assemblies Using a Radiant Heat Energy Source (NFPA 268)  
Standard Test Method for Developing Toxic Potency Data for Use in Fire  
Hazard Modeling (NFPA 269)  
Standard Test Method for Mattresses for Correctional Occupancies (NFPA 284)  
Standard Test Method for Measurement of Smoke Obscuration Using a  
Conical Radiant Source in a Single Closed Chamber (NFPA 270)  
Standard Test Method to Evaluate Fire Performance Characteristics of Pipe  
Insulation (NFPA 274)  
Standard Test Methods for Measurement of Flammability of Materials in  
Cleanrooms Using a Fire Propagation Apparatus (FPA) (NFPA 287)

Scope
This committee shall have primary responsibility for documents covering the design, installation, operation, and maintenance of hybrid (water and inert gas) fire extinguishing systems that use a combination of atomized water and inert gas to extinguish fire. This scope does not include systems that use only inert gas or only atomized water (water mist) to achieve extinguishment. It also does not include twin fluid water mist systems that use inert gas to propel and/or atomize water mist droplets without generating a significant inert gas concentration in the protected space.

Responsibility
Standard on Hybrid (Water and Inert Gas) Fire Extinguishing Systems (NFPA 770)

375
Scope
This Committee shall have primary responsibility for documents on inspection, testing, and maintenance of systems utilizing water as a method of extinguishment. These include sprinkler systems (excluding sprinkler systems installed in one-and two-family dwellings and manufactured homes), standpipe and hose systems, fire service piping and appurtenances, fire pumps, water storage tanks, fixed water spray systems, water mist systems, foam-water systems, valves, and allied equipment. This Committee shall also develop procedures for the conduct and reporting of routine system impairments.

Responsibility

Internal Combustion Engines

Scope
This Committee shall have primary responsibility for documents on the safeguarding against the fire, explosion, and life safety hazards associated with the installation and use of stationary and portable liquid fuel-burning equipment, including: (1) related fuel storage tanks and associated piping, venting systems, pumps, and controls; (2) the combustion air supply and flue gas venting systems for the liquid fuel burning equipment; and (3) combustion and safety controls.

This Committee does not have responsibility for: (1) boiler-furnaces with fuel input ratings of 3660 kW (12,500,000 BTU per hr. or 10,000 lbs. steam per hr.) or more; (2) process ovens; (3) process furnaces; or (4) internal combustion engines.

Responsibility
Standard for the Installation of Oil-Burning Equipment (NFPA 31)

Scope
This Committee shall have primary responsibility for documents on safety code for gas piping systems on consumers’ premises and the installation of gas utilization equipment and accessories for use with fuel gases such as natural gas, manufactured gas, liquefied petroleum gas in the vapor phase, liquefied petroleum gas-air mixtures, or mixtures of these gases, including: a) The design, fabrication, installation, testing, operation, and maintenance of gas piping systems from the point of delivery to the connections with each gas utilization device. Piping systems covered by this Code are limited to a maximum operating pressure of 125 psig. For purposes of this Code, the point of delivery is defined as the outlet of the meter set assembly, or the outlet of the service regulator or service shutoff valve where no meter is provided. b) The installation of gas utilization equipment, related accessories, and their ventilation and venting systems.

Scope
This Committee shall have primary responsibility for documents on
(1) procedures for fire service, public safety and related personnel
certification to NFPA Professional Fire Service Qualifications
Standards or other standards adopted by the authority having
jurisdiction, and (2) procedures for accrediting national, state,
provincial, and local jurisdictions as certifying entities for NFPA
Professional Fire Service Qualifications Standards or other
standards adopted by the authority having jurisdiction.

The Committee shall also have primary responsibility for
documents on procedures for accrediting non-engineering, fire-
related, academic, degree-granting, programs offered by institutions
of post-secondary education.

Staff Liaison  

Alex Ing  
National Fire Protection Association  
One Batterymarch Park  
Quincy, MA 02169
Scope
This Committee shall have primary responsibility for documents on the manufacture, transportation, and storage of consumer and display fireworks, pyrotechnic special effects, and model and high power rocket motors. This Committee shall have primary responsibility for the use of display fireworks and for model and high power rocketry, and the construction, launching, and other operations that involve model and high power rocket motors.

The Committee does not have responsibility for documents on the storage and retail sales of consumer fireworks or the use of consumer fireworks by the general public; on the use of pyrotechnic special effects before a proximate audience; on the manufacture, transportation, storage for use of military, automotive, agricultural, and industrial pyrotechnics.

Responsibility
- Code for Model Rocketry (NFPA 1122)
- Code for Fireworks Display (NFPA 1123)
- Code for High Power Rocketry (NFPA 1127)
- Code for the Manufacture of Model Rocket and High-Power Rocket Motors (NFPA 1125)
- Code for the Manufacture, Transportation, and Storage of Fireworks and Pyrotechnic Articles (NFPA 1124)

Principal: Aaron C. Jones
Scope
This Committee shall be responsible for establishing requirements for the performance and use of remote methodologies, systems and components (including digital video, digital images, digital audio, among others) whether live or submitted as an electronic file for subsequent review to conduct remote inspections of buildings, structures, systems (e.g. electrical, HVAC, fire protection, etc.) and premises including underground spaces and aerial areas. Requirements for collection, custody and maintenance of the data available from remote inspections shall also be the responsibility of this Technical Committee.

Responsibility
Standard for Remote Inspections (NFPA 915)
