UA Joint Apprenticeship Committee Local 669
502 Kings Farm Blvd., #302
Rockville, MD 20850
United Assn. of Journeymen & Apprentices of the Plumbing & Pipe Fitting Industry
### Scope
This Committee shall have overall responsibility for documents that pertain to the criteria for the design and installation of automatic, open and foam-water sprinkler systems including the character and adequacy of water supplies, and the selection of sprinklers, piping, valves, and all materials and accessories. This Committee does not cover the installation of tanks and towers, nor the installation, maintenance, and use of central station, proprietary, auxiliary, and local signaling systems for watchmen, fire alarm, supervisory service, nor the design of fire department hose connections.

### Responsibility
Standard for the Installation of Sprinkler Systems (NFPA 13)

### Hanging and Bracing of Water-Based Fire Protection Systems

Scope
This committee shall have primary responsibility for documents on the selection and design of types of building construction, exterior walls, building height and area, firewalls, and fire barrier walls, as they relate to the protection of life and property from fire. For the processing of NFPA 5000, Chapter 7, and Sections 8.3 and 8.4, this committee reports directly to the NFPA 5000 Correlating Committee; whereas, for the processing of NFPA 220 and NFPA 221, this committee does not report to the NFPA 5000 Correlating Committee.

Responsibility

Scope
This Committee shall have the primary responsibility for documents relating to preventive maintenance of electrical, electronic, and communications systems and equipment used in industrial and commercial type applications with the view of: (1) reducing loss of life and property, and (2) improving reliability, performance, and efficiency in a cost-effective manner. The purpose is to provide generally applicable procedures for preventive maintenance that have broad application to the more common classes of industrial and commercial systems and equipment without duplicating or superseding instructions that manufacturers normally provide. This Committee shall report to Correlating Committee of the National Electrical Code.

Responsibility

Scope
This Committee shall have primary responsibility for documents on performance criteria for the selection and assembly of the components for emergency power systems in buildings and facilities, including categories of power supplies, transfer equipment, controls, supervisory equipment, and all related electrical and mechanical auxiliary or accessory equipment needed to supply emergency power to the utilization equipment. The Committee also shall be responsible for criteria on the maintenance and testing of the system. This Committee does not cover requirements for the application of emergency power systems, self-contained emergency lighting units, and electrical wiring, except that wiring that is an integral part of the system up to the load side of the transfer switch(es). This Committee shall report to Correlating Committee of the National Electrical Code.

**Scope**

This Committee shall have primary responsibility for documents on protective clothing and protective equipment, except respiratory protective equipment, that provides hand, foot, torso, limb, and head protection for fire fighters and other emergency services responders during incidents that involve hazardous materials operations. These operations involve the activities of rescue; hazardous material confinement, containment, and mitigation; and property conservation where exposure to substances that present an unusual danger to responders are present or could occur due to toxicity, chemical reactivity, decomposition, corrosiveness, or similar reactions.

Additionally, this Committee shall have primary responsibility for documents on the selection, care, and maintenance of hazardous materials protective clothing and protective equipment by fire and emergency services organizations and personnel.

**Responsibility**

- Standard on Selection, Care, and Maintenance of Hazardous Materials Clothing and Equipment (NFPA 1891)
- Standard on Vapor-Protective Ensembles for Hazardous Materials Emergencies and CBRN Terrorism Incidents (NFPA 1991)
- Standards for Protective Ensembles for Hazardous Materials and Emergency Medical Operations (NFPA 1990)

Scope
This Committee shall have primary responsibility for documents on special operations protective clothing and protective equipment, except respiratory equipment, that provides hand, foot, torso, limb, head, and interface protection for fire fighters and other emergency services responders during incidents involving special operations functions including, but not limited to, structural collapse, trench rescue, confined space entry, urban search and rescue, high angle/mountain rescue, vehicular extraction, swift water or flooding rescue, contaminated water diving, and air operations.

This Committee shall also have primary responsibility for documents on station/work uniform garments that are not of themselves primary protective garments but can be combined with a primary protective garment to serve dual or multiple functions.

Additionally, this Committee shall have primary responsibility for documents on the selection, care, and maintenance of special operations protective clothing and equipment by fire and emergency services organizations and personnel.

Responsibility

Quincy, MA 02169-7471

Scope
This committee shall have primary responsibility for documents on protective ensembles, except respiratory protection, that provides head, limb, hand, foot, torso, and interface protection for fire fighters and other emergency services responders during incidents involving structural fire fighting operations or proximity fire fighting operations.

Structural fire fighting operations include the activities of rescue, fire suppression, and property conservation during incidents involving fires in buildings, enclosed structures, vehicles, marine vessels, or like properties.

Proximity fire fighting operations include the activities of rescue, fire suppression, and property conservation during incidents involving commercial and military aircraft fires, bulk flammable gas fires, bulk flammable and combustible liquids fires, combustible metal fires, exotic fuel fires, and other such fires that produce very high levels of radiant heat as well as convective and conductive heat.

Additionally, this committee shall have primary responsibility for documents on the selection, care, and maintenance of structural and proximity fire fighting protective ensembles by fire and emergency services organizations and personnel.

Responsibility
Standard on Protective Ensembles for Structural Fire Fighting and Proximity Fire Fighting (NFPA 1971)
Standard on Selection, Care, and Maintenance of Protective Ensembles for Structural Fire Fighting and Proximity Fire Fighting (NFPA 1851)

**Scope**

This Committee shall have primary responsibility for documents on protective clothing and protective equipment, except respiratory protective equipment, that provides hand, foot, torso, limb and head protection, as well as interface protection for fire fighters or other emergency services responders during incidents involving wildland fire fighting operations. These operations include the activities of fire suppression and property conservation in forest, brush, grass, ground cover, and other such vegetation that is not within structures but that is involved in fire.

Additionally, this Committee shall have primary responsibility for documents on the selection, care, and maintenance of wildland fire fighting protective clothing and protective equipment by fire and emergency services organizations and personnel.

**Responsibility**

Standard on Protective Clothing and Equipment for Wildland Fire Fighting (NFPA 1977)

Standard on Selection, Care, and Maintenance of Wildland Fire Fighting Protective Clothing and Equipment (NFPA 1877)
This committee shall have primary responsibility for documents on a Fire Prevention Code that includes appropriate administrative provisions, to be used with the National Fire Codes for the installation, operation, and maintenance of buildings, structures, and premises for the purpose of providing safety to life and property from fire and explosion. This includes development of requirements for, and maintenance of, systems and equipment for fire control and extinguishment. Safety to life of occupants of buildings and structures is under the primary jurisdiction of the Committee on Safety to Life.

Scope
This Committee shall have primary responsibility for documents on fire testing procedures, for reviewing existing fire test standards and recommending appropriate action to NFPA, for recommending the application of and advising on the interpretation of acceptable test standards for fire problems of concern to NFPA technical committees and members, and for acting in a liaison capacity between NFPA and the committees of other organizations writing fire test standards. This Committee does not cover fire tests that are used to evaluate extinguishing agents, devices, or systems.

Responsibility
Recommended Practice for a Field Flame Test for Textiles and Films (NFPA 705)
Recommended Practice for Determining Smoke Generation of Solid Materials (NFPA 258)
Standard for Fire Testing of Passive Protection Materials for Use on LP-Gas Containers (NFPA 290)
Standard Method of Fire Test for Determining the Heat Release Rate of Roofing Assemblies with Combustible Above-Deck Roofing Components (NFPA 276)
Standard Method of Fire Test for Individual Fuel Packages (NFPA 289)
Standard Method of Fire Tests for the Evaluation of Thermal Barriers (NFPA 275)
Standard Method of Test for Critical Radiant Flux of Floor Covering Systems Using a Radiant Heat Energy Source (NFPA 253)
Standard Method of Test for Determining Resistance of Mock-Up Upholstered Furniture Material Assemblies to Ignition by Smoldering Cigarettes (NFPA 261)
Standard Method of Test for Flame Travel and Smoke of Wires and Cables for Use in Air-Handling Spaces (NFPA 262)
Standard Methods of Fire Tests for Evaluating Contribution of Wall and Ceiling Interior Finish to Room Fire Growth (NFPA 286)
Standard Methods of Fire Tests for Evaluating Room Fire Growth Contribution of Textile or Expanded Vinyl Wall Coverings on Full Height Panels and Walls (NFPA 265)
Standard Methods of Fire Tests for Flame Propagation of Textiles and Films (NFPA 701)
Standard Methods of Fire Tests of Door Assemblies (NFPA 252)
Standard Methods of Fire Tests of Horizontal Fire Door Assemblies Installed in Horizontal Fire Resistance-Rated Assemblies (NFPA 288)
Standard Methods of Tests and Classification System for Cigarette Ignition Resistance of Components of Upholstered Furniture (NFPA 260)
Standard Methods of Tests for Evaluating Fire and Ignition Resistance of Upholstered Furniture Using a Flaming Ignition Source (NFPA 277)
Standard on Fire Test for Window and Glass Block Assemblies (NFPA 257)
Standard Test Method for Developing Toxic Potency Data for Use in Fire Hazard Modeling (NFPA 269)
Standard Test Method for Mattresses for Correctional Occupancies (NFPA 284)
Standard Test Method for Measurement of Smoke Obscuration Using a Conical Radiant Source in a Single Closed Chamber (NFPA 270)
Standard Test Method to Evaluate Fire Performance Characteristics of Pipe Insulation (NFPA 274)

Scope
This Committee shall have primary responsibility for documents on
the manufacture, selection, care, and use of garments and
equipment used for protection of industrial personnel where there is
potential for flash fire. Industrial personnel include workers who
are potentially or may accidentally be exposed to hydrocarbon or
combustible dust flash fires, and not electrical flashes. These
documents do not cover fire fighters and other emergency services
personnel.

Responsibility
Standard on Flame-Resistant Clothing for Protection of Industrial Personnel
Against Short-Duration Thermal Exposures from Fire (NFPA 2112)
Standard on Selection, Care, Use, and Maintenance of Flame-Resistant

Scope
This Committee shall have primary responsibility for documents on fire hazard calculation procedures for use by other Committees in writing provisions to control the fire hazards of contents and furnishings. This Committee shall also provide guidance and recommendations to Committees in assessing the fire hazard of contents and furnishings. It shall establish classification and rating systems, request the development and standardization of appropriate fire tests, and identify and encourage necessary research as it relates to the fire hazards of contents and furnishings. It shall act in a liaison capacity between NFPA and the committees of other organizations with respect to the hazard of contents and furnishings.

Responsibility
Guide on Methods for Evaluating Fire Hazard to Occupants of Passenger Road Vehicles (NFPA 556)
Guide on Methods for Evaluating Potential for Room Flashover (NFPA 555)
Standard for Determination of Fire Loads for Use in Structural Fire Protection Design (NFPA 557)

Scope
This committee shall have primary responsibility for documents covering the design, installation, operation, and maintenance of hybrid (water and inert gas) fire extinguishing systems that use a combination of atomized water and inert gas to extinguish fire. This scope does not include systems that use only inert gas or only atomized water (water mist) to achieve extinguishment. It also does not include twin fluid water mist systems that use inert gas to propel and/or atomize water mist droplets without generating a significant inert gas concentration in the protected space.

Responsibility
Standard on Hybrid (Water and Inert Gas) Fire Extinguishing Systems (NFPA 770)

### Staff Liaison

**Heath Dehn**  
National Fire Protection Association  
One Batterymarch Park  
Quincy, MA 02169-7471

### Scope

This Committee shall have primary responsibility for documents on the storage, transfer, and use of industrial gases. Included are the storage and handling of such gases in their gaseous or liquid phases; the installation of associated storage, piping, and distribution equipment; and operating practices. The Committee also has a technical responsibility for contributions in the same areas for medical gases and clean rooms. The Committee shall coordinate the material on gaseous and liquid hydrogen storage and use with the Hydrogen Technology Committee.

### Responsibility

- Compressed Gases and Cryogenic Fluids Code (NFPA 55)
- Standard for the Design and Installation of Oxygen-Fuel Gas Systems for Welding, Cutting, and Allied Processes (NFPA 51)

### Industrial Trucks

Scope
This Committee shall have primary responsibility for documents on safety code for gas piping systems on consumers' premises and the installation of gas utilization equipment and accessories for use with fuel gases such as natural gas, manufactured gas, liquefied petroleum gas in the vapor phase, liquefied petroleum gas-air mixtures, or mixtures of these gases, including: a) The design, fabrication, installation, testing, operation, and maintenance of gas piping systems from the point of delivery to the connections with each gas utilization device. Piping systems covered by this Code are limited to a maximum operating pressure of 125 psig. For purposes of this Code, the point of delivery is defined as the outlet of the meter set assembly, or the outlet of the service regulator or service shutoff valve where no meter is provided. b) The installation of gas utilization equipment, related accessories, and their ventilation and venting systems.

Scope
This Committee shall have primary responsibility for documents on the manufacture, transportation, and storage of consumer and display fireworks, pyrotechnic special effects, and model and high power rocket motors. This Committee shall have primary responsibility for the use of display fireworks and for model and high power rocketry, and the construction, launching, and other operations that involve model and high power rocket motors.

The Committee does not have responsibility for documents on the storage and retail sales of consumer fireworks or the use of consumer fireworks by the general public; on the use of pyrotechnic special effects before a proximate audience; on the manufacture, transportation, storage for use of military, automotive, agricultural, and industrial pyrotechnics.

Responsibility
Code for Model Rocketry (NFPA 1122)
Code for Fireworks Display (NFPA 1123)
Code for High Power Rocketry (NFPA 1127)
Code for the Manufacture of Model Rocket and High-Power Rocket Motors (NFPA 1125)
Code for the Manufacture, Transportation, and Storage of Fireworks and Pyrotechnic Articles (NFPA 1124)

Scope
This committee shall have primary responsibility for documents on
the risk analysis, design, application, installation, and performance
of emergency communications systems and their components.
Public emergency services communications systems covered by
NFPA 1221 are outside the scope of this committee except where
they interface with in-building bi-directional amplifiers and where
trouble and supervisory signals are intended to be monitored by the
building fire alarm system.

Staff Liaison

Richard J. Roux
National Fire Protection Association
One Batterymarch Park
Quincy, MA 02169-7471

Scope
This Committee shall have primary responsibility for documents on the proper configuration, performance, installation, and operation of public emergency alarm reporting systems and auxiliary alarm systems. The Committee scope shall include systems that use a communication infrastructure that is publicly owned, operated, and controlled. Reporting of alarms by voice over the public switched telephone network utilizing the Universal Emergency Number 9-1-1, or any other telephone number that can be dialed, is outside the scope of this committee.

Responsibility

Scope
This Committee shall have primary responsibility for documents on
the controlled use of flame, pyrotechnics, or other means of special
effects for entertainment, exhibition, demonstration, or simulation
before a proximate audience; and the design, fabrication,
installation, testing, control, operation, and maintenance of user
equipment, fuel storage, and sources for special effects before a
proximate audience.

This Committee does not have responsibility for documents on
hazards other than those involving a proximate audience and the life
safety considerations of the audience.

Responsibility
- Standard for the Use of Flame Effects Before an Audience (NFPA 160)
- Standard for the Use of Pyrotechnics Before a Proximate Audience (NFPA 1126)
