

Make a  
Convincing Case  
for  
**Home Fire  
Sprinklers**

## Beware of false claims

Sprinkler opponents like to tout that “newer homes are safer homes.” In actuality, newer homes tend to have larger open spaces, lightweight construction materials, and furniture stuffed with combustible materials — all factors that exacerbate fire spread and lead to homes burning more quickly than ever before. These threats place both homeowners and firefighters at significant risk.
