Trump Tower fire is second 2018 blaze in sprinkler-free residential tower

By CAROLINE LINTON    CBS NEWS   April 8, 2018, 12:06 AM

Last Updated Apr 8, 2018 7:30 AM EDT

The fire on the 50th floor New York City’s Trump Tower that left 67-year-old Todd Brassner dead and six firefighters injured was the second fire in the building in 2018. President Trump’s centerpiece Manhattan skyscraper opened in 1984, but does not have sprinklers on its residential floors, a measure required in new buildings since 1999. President Trump, then a private citizen and property developer, lobbied to try and prevent the mandate at the time.

New York City in 1999 became last big city in the nation to require sprinklers, according to the New York Daily News. Under the 1000 legislation, building...

2018 Home Fire Sprinkler Day

HOME FIRE SPRINKLER DAY
A project of NFPA's Fire Sprinkler Initiative and the Home Fire Sprinkler Coalition

Saturday, May 19, 2018
#HomeFireSprinklerDay

The vast majority of fire deaths in North America happen at home. The time has come to bring attention to this problem—and its solution.

NFPA’s Fire Sprinkler Initiative, the Home Fire Sprinkler Coalition, and the Home Fire Sprinkler Coalition-Canada are initiating Home Fire Sprinkler Day. This project tasks fire sprinkler advocates across North America with hosting events on the same day that promote home fire sprinklers. These events are aimed at raising awareness of this life-saving technology while breaking down the myths and legislative barriers to its use. The goal is to have safety advocates host at least one sprinkler-related event in all 50 states and in some Canadian provinces and territories.

Introducing NFPA 3000™ (PS)

NFPA's new Standard for an Active Shooter / Hostile Event Response (ASHER) Program is now available. Tragedies of today require integrated, coordinated response. Find out how NFPA 3000™ (PS) helps your community plan, respond and recover.

LEARN MORE ABOUT THE NEW PROVISIONAL STANDARD

See all NFPA 3000™ (PS) products

Purchase the standard (print or online) and see training opportunities.

Enroll in online training

Take the NFPA 3000™ (PS) Plan for an Active Shooter/Hostile Event Response Online Training and learn how to develop an effective and integrated plan.

Take the Readiness Assessment

Take the NFPA 3000™ (PS) Readiness Assessment to help you determine your level of preparedness.
