Roughly **two thirds of home fire deaths** happen in homes with no smoke alarms or no working smoke alarms.

**Smoke alarms should be installed** on every level of the home, outside each sleeping area and inside each bedroom.

For the best protection, **interconnect** all the smoke alarms so when one sounds, they all sound.

**Replace smoke alarms** 10 years from the date of manufacture.

**Test** all smoke alarms at least **once a month** by pushing the test button.

When the smoke alarm sounds, **get outside and stay outside**.

Go to your **outside meeting place**. **Call the fire department** from a cell or neighbor’s phone.

Stay outside until the fire department tells you it is safe to go back inside.
