

General Rules for Heating with a Portable Kerosene Heater

1. Make sure your heating equipment is allowed in your community.
2. Keep your heater at least 3 feet away from anything that can burn.
3. Always use the proper grade of the proper fuel, and never use gasoline in a heater designed for kerosene.
4. Refuel in a well-ventilated area, preferably outside, when the heater has cooled.
5. Install carbon monoxide alarms in your home.
