Hover board — part toy, part transportation. These self-balancing scooters have quickly become the latest fad. However, many hover boards have been linked to fires. NFPA urges you to be fire safe when using these devices.

**IF YOU PURCHASE A HOVER BOARD**
- Choose a device with the seal of an independent testing laboratory.
- Read and follow all manufacturer directions. If you do not understand the directions, ask for help.
- An adult should be responsible for charging the hover board.
- Do not leave a charging hover board unattended.
- Never leave the hover board plugged in overnight.
- Only use the charging cord that came with the hover board.
- Stop using your hover board if it overheats.
- Extreme hot or cold temperature can hurt the battery.

**NEW TO MARKET**
Hover boards are fairly new to the mass market. Be on the lookout for updates from manufacturers and safety groups.

**Signs of a Problem**
Some hover board fires have involved the Lithium-Ion battery or charger. Signs you could have a problem:
- Leaking fluids
- Excessive heat
- Odor
- Sparking
- Smoke

If you notice any of these signs, stop using the device right away. Call 9-1-1. If safe to do so, move the hover board outside away from anything that can burn.

**Travel Notes**
- Many airlines have banned hover boards. If you plan to fly with a hover board, be sure to check with your air carrier.
- When riding in a car, keep the hover board where you can see it in case it shows signs of a problem.
