1. Turn the ignition key to the off position
2. Remove key from ignition
3. Turn off 12V red switch.

Handbrake

12V Switch ON

12V Switch OFF

Ignition Key OFF

### WARNINGS

-  NEVER cut, breach, or touch high voltage components or cabling. Doing so could result in serious injury or death.
-  The high voltage system may remain powered for up to 1 minute after the vehicle is shut off.
-  The SRS system (airbags, etc.) may remain powered for up to 1 minute after disabling.
-  Lack of engine noise does not mean vehicle is OFF. Silent movement or instant restart capability exists until vehicle is fully shut down.
