LUCID AIR SEDAN
2021 - Present

Airbag
 Stored gas inflator
 Seatbelt pretensioner
 SRS control unit
 Pedestrian protection active system

Automatic rollover protection system
 Gas strut / pre-loaded spring
 High strength zone
 Zone requiring special attention
 High voltage component

Battery low voltage
 Ultra capacitor, low voltage
 Fuel tank
 Gas tank
 Safety valve

High Voltage battery pack
 High voltage power cable / component
 High voltage disconnect
 Fuse box disabling high voltage system
 Ultra capacitor, high voltage

Cable cut
1. Identification / recognition

**WARNING** Lack of engine sounds does not mean the vehicle is off. Silent movement or instant restart capabilities exist until vehicle is fully shut down. Wear appropriate PPE.

2. Immobilization / stabilization / lifting

1.  2.  3.

   - Approved lifting points
   - Safe stabilization points for a Lucid Air on it’s side.
   - High Voltage Battery pack - Do not use for lifting or stabilization

3. Disable direct hazards / safety regulations

1.  2.  3.  4.

   - If vehicle is charging, disconnect charger.
4. Access to the occupants

All windows consist of laminated safety glass.
Note: Rapid extrication activities may require the use of high-pressure punch and glass cutters.

WARNING Electrical and mechanical releases may be compromised after a collision.

- If exterior door handles are inoperative, break glass as needed to access interior handles.
- Slide handle back once to unlock the door, then cycle again to open.

5. Stored energy / liquids / gases / solids

Warning Never cut, breach, or touch high voltage components or cabling. Doing so could result in serious injury or death.

6. In case of fire

Only use water to extinguish the battery pack. Submerging the vehicle is not recommended.

For real time support for firefighting/rescue operations involving the Lucid Air, Call 1-855-ESA-SAFE

Potential for reignition exists. Monitor with appropriate equipment.

7. In case of submersion
Wear appropriate PPE when handling any submerged vehicle. Submerged vehicles should be staged in a safe area upon removal and monitored for thermal and physical indications of a thermal event for 45 minutes prior to transport. After the vehicle removed from water continue with disabling process. Vehicle should then be drained of water.

8. Towing / transportation / storage

Must be towed via flatbed only with wheels off the ground, Dollies are not permitted.

**WARNING**

- It is possible for the High Voltage battery to ignite or re-ignite after an incident. Store the vehicle a minimum of 50 feet or 15 meters from other vehicles, structures, and flammable materials for a minimum of 24 hours and monitor temperatures with Thermal imaging Camera.

**WARNING**

- The vehicle recovery eye cannot be used if the pull angle is greater than 25 degrees from eye center horizontally or greater than 5 degrees from eye center vertically. Exceeding these limits may result in serious injury or death.

9. Important additional information

For real time support for firefighting/rescue operations involving the Lucid Air, call 1-855-ESA-SAFE and a rescue specialist will be available 24/7 to answer any questions.
