## Airbag
- Stored gas inflator
- Seat belt pretensioner
- SRS control unit
- Pedestrian protection active system

## Automatic rollover protection system
- Gas strut / Preloaded spring
- High strength zone
- Zone requiring special attention

## Battery low voltage
- Ultra capacitor, low voltage
- Fuel tank
- Gas tank
- Safety valve

## High voltage battery pack
- High voltage power cable / component
- High voltage disconnect
- Fuse box disabling high voltage system
- Ultra capacitor, high voltage

## Low voltage device that disconnects high voltage

1. Identification / Recognition

- Location of vehicle badges

- Energy source: Lithium-ion battery

2. Immobilisation / Stabilisation / Lifting

- Completely immobilize the vehicle

  1) Chock the wheels and engage the parking brake.

  2) Press the P position switch.

- Stabilisation-lifting point

  Place cribbing such as wooden blocks at the four points under the front and rear pillars.

---

Do not place cribbing such as wooden blocks or rescue air lifting bags under the high voltage power cables. Doing so may result in fire, or electric shock.
3. Disable direct hazards / Safety regulations

If any of the following systems are required to be operated, operate them BEFORE disconnecting the battery.

- Power door lock
- Power window
- Power seat
- Power Back door
- Electric parking brake
- Electronic shift matic

When the 12 V battery is disconnected, electrical components cannot be operated.

Perform procedure Main or Alternative to completely shut off the vehicle.

<Procedure Main>

<Procedure Alternative>

Access to 12 V Battery

4. Access to the occupants

Window Glass

5. Stored energy / Liquids / Gases / Solids

- Always wear appropriate personal protective equipment (PPE) when dealing with any of these items.
- Never breach or remove the battery assembly cover under any circumstances, including fire. Doing so may result in serious injury or death from severe burns or electric shock.

6. In case of fire

USE COPIOUS AMOUNTS OF WATER

If it is difficult to apply copious amounts of water to the high voltage battery, it is recommended to allow the high voltage battery to burn itself out.

RE-IGNITION POSSIBLE!

7. In case of submersion

Do not touch any of the high-voltage components or cables, including the service plug, while the vehicle is submerged. Doing so may result in electric shock.

Work on the vehicle only after the vehicle has been pulled out of the water.

8. Towing / Transportation / Storage

RE-IGNITION POSSIBLE!

Store the vehicle at a safe distance (15 m (49.2 ft) or more) from other vehicles.

9. Important additional information
