

SIEMENS
Ingenuity for life

Stop by our booth #1807 at the NFPA Expo to learn more.

Technology designed for the safety of the occupants and life of the building.

Creating perfect places for a safer world. That's Ingenuity for life.

Every place deserves to be as safe as possible, no matter what the future brings. Siemens fire and life safety systems are designed to help keep buildings safe over the entire lifecycle, through new occupants, reconfigurations, modernizations and expansions. Our portfolio features highly effective technology that's engineered to maximize adaptability and longevity. In addition, our planning tools make specifying easy and help you create a building that stands the test of time.

Unparalleled Choices for Creating Perfect Places

Come visit Siemens at Booth #1807!

Our complete portfolio of fire products and systems can be tailored to your specific needs, creating a perfect place for you, your business and your customers. Our Cerberus® PRO and Desigo® Fire Safety portfolios offer backwards compatibility and a clear migration plan, as well as the latest technologies to help keep your building safe over time.

Visit our Siemens booth to see the latest in our portfolio including:

SL- Series LED Notification Appliances

A full portfolio of notification appliances based on highly efficient LED technology which is modern and cost efficient for any facility.

Desigo Fire Safety Modular and Cerberus PRO Modular

The latest large market solutions from Siemens – install a scalable, customizable system that evolves as your needs change.

MXL Migration

The MXL system is reaching the end of its service period in 2018 – maximize your fire protection with a phased approach that will maximize your investment and avoid costly maintenance in the future.

Check out these demos from the Siemens team:

SpecWriter™ Tool makes it easy for engineers to spec performance

The Siemens SpecWriter tool is the fastest and easiest way to create professional life safety systems specifications. The tool offers a user-friendly interface that guides you to the right specification and allows you to create custom specification text without model numbers. The ease of this tool ensures your focus is on the performance that will keep each facility safe.

Check out the latest features of SpecWriter in our booth demo! In this demo, we will walk you through SpecWriter and show you the latest features.

Remote Connectivity increases serviceability

Remote Connectivity allows you to access information generated someplace else. Learn about the ways that we can connect to our Siemens Fire Systems to access real-time information on demand. This information allows better and more accurate response for increased serviceability for our customers.

In this demo we will walk through the ways we are creating these connection solutions today!

Have any questions? Visit the booth and our team would be happy to assist on your next project.

Schedule for the demos: Both demos run every hour for ~10 mins.

Monday ☕ 3:30PM, 4:30PM, 5:30PM

Tuesday ☕ 10:30AM, 11:30AM, 12:30PM, 1:30PM, 2:30PM, 3:30PM

Wednesday ☕ 10:30AM, 11:30AM, 12:30PM, 1:30PM

Drop by our booth for a free cup of coffee and learn how Siemens can help you create a safer place.
