

NEW eLEARNING

Testing & Certification of Firefighting Foam & Foam Equipment

Testing & Certification of Firefighting Foam & Foam Equipment

Learn how to shorten the certification time and reduce time to market by understanding how the combination of a foam liquid concentrate with specific foam equipment is tested. This interactive 60 minute eLearning course is highly relevant for manufacturers of foam liquid concentrates and foam equipment seeking UL testing and certification.

Earn Continuing Education Units (CEUs) with successful completion of this IACET accredited course.

For more information or to register, please visit us at Booth 1531, or visit UL.com/blsttraining and navigate to Fire Suppression.

NFPA attendees receive this course free of charge through July 1, 2018.
