MEMORANDUM

To: The Technical Committee on Public Emergency Service Communication
From: Stacey Van Zandt
Date: March 28, 2011
Subject: Supplemental Ballot on NFPA 1221 – Log CP17 ROP Ballot (A12)

Attached you will find a Supplemental Ballot and Proposal on NFPA 1221 – Log CP17, Standard for the Installation, Maintenance, and Use of Emergency Services Communications Systems.

The ballot is for formally voting on whether or not you concur with the Committee's Actions on the proposal. If you do not concur, or you abstain, you must provide a technical reason.

Please do not vote negatively because of editorial errors. However, please bring such errors to my attention for correction.

Please return your ballot as soon as possible, but no later than Friday, April 1, 2011. Your cooperation in meeting this deadline is appreciated.

Note: Please remember that the return of ballots and attendance at Committee Meetings are required for all Principal and Alternate members in accordance with the Regulations Governing Committee Projects.

Attachments: Proposal
9.3.4.1.1 The trucked system shall operate using a dedicated signaling control channel protocol concept embodied in, either a distinct RF channel used for control signaling only, or embedded control signals in the voice channels such that a dedicated RF channel for control signaling is not necessary but the same results is affected.

Substantiation: Clarifies the intent to provide further information on trunked radio systems.
Committee Meeting Action: Accept
