ERRATA

NFPA 13

Standard for the Installation of Sprinkler Systems

2016 Edition

Reference: Figures 16.3.1.3.1.1(A)(a) and (c)

Errata No: 13-16-1

The Committee on Sprinkler System Discharge Criteria and the Correlating Committee on Automatic Sprinkler Systems notes the following error in the 2016 edition of NFPA 13, Standard for the Installation of Sprinkler Systems.

1. Replace Figures 16.3.1.3.1.1(A)(a) and (c) with the following:

Figure 16.3.1.3.1.1(A)(a)

Notes:

1. Symbol x indicates in-rack sprinklers.
2. Each square represents a storage cube measuring 4 ft to 5 ft (1.2 m to 1.5 m) on a side. Actual load heights can vary from approximately 16 in. (450 mm) up to 10 ft (3.0 m). Therefore, there could be as few as one load or as many as six or seven loads between in-rack sprinklers that are spaced 10 ft (3.0 m) apart vertically.
Figure 16.3.1.3.1.1(A)(c)

Notes:
1. Alternate location of in-rack sprinklers. Sprinklers shall be permitted to be installed above loads A and C or above loads B and D.
2. Symbol \( \Delta \) or \( x \) indicates sprinklers on vertical or horizontal stagger.
3. Each square represents a storage cube measuring 4 ft to 5 ft (1.2 m to 1.5 m) on a side. Actual load heights can vary from approximately 18 in. (450 mm) up to 10 ft (3.0 m). Therefore, there could be as few as one load or as many as six or seven loads between in-rack sprinklers that are spaced 10 ft (3.0 m) apart vertically.

Issue Date:  October 29, 2015
