NFPA[®] 58
Liquefied Petroleum Gas Code
2011 Edition

Reference: 11.1.1, A.11.1.1, and 11.15.2

TIA 11-4

(SC 13-3-6/TIA Log #1079)

Pursuant to Section 5 of the NFPA *Regulations Governing the Development of NFPA Standards*, the National Fire Protection Association has issued the following Tentative Interim Amendment to NFPA 58, *Liquefied Petroleum Gas Code*, 2011 edition. The TIA was processed by the Technical Committee on Liquefied Petroleum Gases, and was issued by the Standards Council on March 7, 2013, with an effective date of March 27, 2013.

A Tentative Interim Amendment is tentative because it has not been processed through the entire standards-making procedures. It is interim because it is effective only between editions of the standard. A TIA automatically becomes a public input of the proponent for the next edition of the standard; as such, it then is subject to all of the procedures of the standards-making process.

1. Revise 11.1.1 and A.11.1.1 to read:

11.1.1* This chapter applies to engine fuel systems on vehicles using LP-Gas in internal combustion engines, including containers, container appurtenances, carburetion equipment, piping, hose and fittings, and their installation.

A.11.1.1 Chapter 11 covers engine fuel systems for engines installed on vehicles for any purpose, as well as fuel systems for portable engines.

2. Relocate 11.15.2 and subsequent paragraphs to a new Section 6.26 and renumber Section 11.16 as 11.15 and Section 6.26 as 6.27 and subsequent paragraphs:

6.26 Containers for Stationary Engines.

6.26.1 LP-Gas containers for stationary installations shall be located outside of buildings unless the buildings comply with the requirements of Chapter 10.

6.26.2 Containers for stationary engines shall be installed to meet the separation requirements of Section 6.3.

6.26.3 Where containers for stationary engines have a fill valve with an integral manual shutoff valve, the minimum separation distances shall be one-half of the distances specified in Section 6.3.
