

**NFPA 1127-2018 Edition**

Code for High Power Rocketry

**TIA Log No.:** 1260

**Reference:** 4.16.3.3

**Comment Closing Date:** March 23, 2017

**Submitter:** Glenn Dean, Colonial Heights, VA

*1. Revise 4.16.3.3 to read as follows:*

**4.16.3.3** When three or more rockets are to be launched simultaneously, the minimum spectator and participant distance shall be ~~twice~~ the value set forth in Table 4.16.3 for a complex rocket with the same total installed impulse, but not more than 610 m (2000 ft), or 1.5 times the highest altitude expected to be reached by any of the rockets, whichever is less.

**Substantiation:** The word twice was inserted at the ROP stage. Changes to this section were made at the ROC stage. These changes did not include the word twice. It is unclear if the committee intended to leave the word twice in this section as per the ROP meeting or strike the word twice from the document at the ROC. The removal of the word twice will correlate with the ballot language at the ROC for the 2013 edition.

**Emergency Nature:** The standard contains an error or an omission that was overlooked during the regular revision.

*Anyone may submit a comment by the closing date indicated above. To submit a comment, please identify the number of the TIA and forward to the [Secretary, Standards Council, 1 Batterymarch Park, Quincy, MA 02169-7471](#).*
