Leaders in thought, innovation, and practice across the fire and life safety landscape will come together for an educational program highlighting the application and implementation of the Fire & Life Safety Ecosystem. We want those attending in 2020 to learn from your valuable experiences using the Ecosystem model.

NFPA Conference & Expo®, the premier event in fire, electrical, and life safety, will be traveling to Orlando, FL in 2020. If you’re passionate about safety and ready to deliver a dynamic presentation at the event, we want to hear from you.

What Is the Fire & Life Safety Ecosystem?
In 2018, NFPA® introduced the Fire & Life Safety Ecosystem [nfpa.org/ecosystem], an 8-point model that demonstrates the interdependence of our diverse stakeholder groups, as well as how fire and life safety is more effectively achieved when all elements work in harmony.

FOR CONFERENCE & EXPO 2020, NFPA IS PARTICULARLY INTERESTED IN SESSIONS THAT ADDRESS:

The Fire & Life Safety Ecosystem—how the Ecosystem model has been used to create change and improve fire and life safety.

Code Compliance—where and how collaboration has improved inspection practices and outcomes, or resulted in unique approaches driving code compliance, while maintaining facility function and appearance.

Building Life Cycle—how the Ecosystem has been applied to the life cycle of a building or facility.

Preparedness and Emergency Response—emergency responder health and wellness, community risk reduction, efforts to grow and cultivate an informed public.

Active Shooter and Hostile Event—how the Ecosystem applies to shared experiences planning, responding, or recovering.

Emerging Technology—mobility/transportation (autonomous vehicles and AFV), renewable energy (ESS and PV), training and education (AR and VR), and smart systems and IoT (smart home and appliances and AI/robotics), etc.

Investment in Safety and Skilled Workforce—application of the Ecosystem focused on the workforce and their role in improving safety.

Data—impactful ways of collecting, sharing, analyzing, and visualizing information.
SELECTION CRITERIA

The Review and Selection Committee will evaluate all proposals based on factors including topic relevance, perceived value to attendees, and submitter’s experience and credentials. Preference will be given to those proposals that incorporate one or more of the following:

• Interactivity encouraging audience participation (e.g., in-session polling, small group discussion, etc.)
• Case studies that detail specific problems, including lessons learned and guidance as to how those lessons can be applied
• Panel discussions that examine a single concept from multiple perspectives and encourage attendees to re-examine their own assumptions or practices
• Collaboration across stakeholder groups and demonstration of how different perspectives impact and influence outcomes
• Sessions that appeal to attendees at all levels of experience

HOW TO SUBMIT

• All session applications must be received by September 16, 2019 at 5:00 p.m. ET. For assistance regarding session content, please contact Stacey Moriarty.
• Visit nfpa.org/2020proposals to complete your proposal submission.
