

5 TIPS TO ESTABLISH EFFECTIVE REMOTE VIDEO INSPECTION PROGRAMS

Procedures

Develop policies for RVI and share with key stakeholders and the public.

Remote video inspection (RVI) programs can be used as potential alternatives to on-site inspections. These 5 key aspects should be part of any RVI program.

Completion

Communicate RVI results or items for follow up in a timely manner.

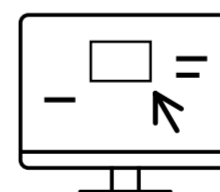

Communication

Communicate the nature of RVI to ensure the health and safety of all involved.

Verification

Determine the type, time, location, and people required for the inspection.

Technology

Select the live video tools to safely and securely perform RVI.
