

INDUSTRIAL  
HAZARDS SOLUTIONS

BE CONFIDENT.  
KNOW THEY'RE  
SAFER.

## HELP ENSURE THAT YOU'RE UP TO DATE WITH THE LATEST CRITERIA FOR THE USE OF GAS IN HOMES AND BUILDINGS.

**NFPA 54/ANSI Z223.1, National Fuel Gas Code**, is an industry-accepted standard. **The 2021 edition** is the cumulative result of the vast knowledge of a broad range of stakeholders and organizations with expertise in gas piping and equipment and the use of gaseous fuels.

### GET YOUR COPY OF THE 2021 EDITION TODAY.

NFPA 54 offers comprehensive provisions for the safe design, installation, operation, maintenance, purging, and inspection of gas piping, equipment, accessories, and appliances supplied with fuel gas.

### CHANGES TO THE 2021 EDITION

The recently amended NFPA 54 features significant changes and additions to account for state-of-the-art equipment, practices, materials, trends, and technology. Among the many updates are topics including:

- Compliance with the appropriate ANSI/CSA appliance listing standard

- Vent terminal clearances
- Defined engineering methods
- Electric isolation requirements for gas piping installation

## HELP PROTECT LIVES AND PROPERTY FROM HAZARDS.

**Make sure you have the most current provisions to better ensure safety and help protect against the many hazards inherent with the utilization of gaseous fuels.**
