

FIRE PROTECTION
SYSTEMS SOLUTIONS

THE NEW BENCHMARK FOR FIRE ALARM SYSTEMS.

Get updates to reflect the latest technologies, applications, and research.

NFPA 72®, *National Fire Alarm and Signaling Code*®, has been expanded and updated to reflect user needs and concerns in the field today. The 2019 edition of NFPA 72 is a must-have resource for everyone involved with fire alarm design, installation, inspection, and maintenance.

GET THE MOST CURRENT REQUIREMENTS IN THE 2019 EDITION.

- Major revisions to the requirements for fire service access elevators and occupant evacuation elevators.
- Added testing requirements for energy storage systems (ESS).
- New requirements for HVLS fans and air-sampling smoke detectors.
- NFPA 72 now addresses carbon monoxide protection: Material previously in NFPA 720, Standard for the Installation of Carbon Monoxide (CO) Detection and Warning Equipment, is relocated into the 2019 edition of NFPA 72.

Other key changes address occupant evacuation, areas of refuge, and VRLA batteries.

GET THE EXPANDED AND UPDATED NFPA 72.

This edition features the latest important requirements for designers, installers, AHJs, and anyone responsible for any aspect of fire alarm and signaling systems. Stay up to date, up to code, and up to the highest standards of safety.
