New Process. New Regulations. New Dates. Annual 2014 Documents-What and When?

November 2010, the NFPA Board of Directors approved a comprehensive set of revisions to the NFPA Regulations Governing Committee Projects (the current Regulations or Regs), the regulations that govern NFPA's standards development process. The new Regulations are titled Regulations Governing the Development of NFPA Standards (the new Regulations or Regs). During the transition period, NFPA standards development will be operating under two sets of Regulations. The new Regulations will be in effect for Standards reporting in the Fall 2013 Revision Cycle and all subsequent revision cycles. Standards reporting up to and including the Annual 2013 cycle will operate in the current Regulations. In the NFPA Standards Directory, both sets of Regulations are clearly identified with an appropriate footer on each page. For additional information on the new Codes and Standards process or to view the new regulations go to www.nfpa.

New Project Proposed on Emergency Mass Shelters

At its October 2011 meeting, The Standards Council considered the request of Dean Larson of Larson Performance Consulting that NFPA consider the establishment of a new project on Emergency Mass Shelters. After review of all the material before it, the Council voted to publish a notice to solicit comments on the need for the project, information on resources on the subject matter, those interested in participating if established, and other organizations actively involved with the subject. Anyone interested in commenting on this proposed project is invited to do so in writing.

The following justification for the new project has been submitted:

a. Explain the Scope of the new project/document:

Provide a guide for using large buildings such as an arena, large sporting venues and warehouses for mass sheltering outside of the normal sheltering provided by a Non Government Organization (NGO) such as the Red Cross.

b. Provide an explanation and any evidence of the need for the new project/document:

Events such as Katrina, major flooding events such as the Mississippi River that would require a jurisdiction to provide sheltering for several thousands of people for longer periods of time that your normal sheltering plan, which could be for two to three days. These long term sheltering plans could last several weeks and up to a couple of months.

c. Identify intended users of the new project/document:

Local, State and Federal agencies, NGO, Not-For-Profit, Faith Based Organizations (FBO)

d. Identify individuals, groups and organizations that should review and provide input on the need for the proposed new project/document, and provide contact information for these groups:

Local, State and Federal agencies, NGO, Not-For-Profit, Faith Based Organizations (FBO) [see g. below] and FEMA.

e. Identify individuals, groups and organizations that will be or could be affected, either directly or indirectly by the proposed new project/document, and what benefit they will receive by having this new document available:

Local, State and Federal agencies, emergency management coordinators and planners, NGO, Not-For-Profit and Faith Based Organizations (FBO).

f. Identify other related documents and projects on the subject both within NFPA and external to NFPA:

NFPA 1600 Disaster/Emergency Management Business continuity Programs 2010 edition

U.S. Department of Health and Human Services Administration for Children and Supplies "Title 9 Sheltering Standards, Services and Supplies"

Red Cross Red Crescent "Guidelines for the Domestic Facilitation and Regulation of international Disaster Relief and Initial Recovery Assistance"

U.S. Department of Homeland Security National Response Framework "Emergency Support Function #6 – Mass Care, Emergency Assistance, Housing and Human Services"

Guidance on Planning for Integration of Functional Needs Support Services in General Population Shelters. FEMA

g. Identify the technical expertise and interest necessary to develop the project/document and if the committee membership currently contains this expertise and interest:

Volunteers serving the following organizations represent the type of experience needed for this type of standard: Adventists Community Services, American Baptist Men, American Radio Relay League, American Red Cross, Brethren Disaster Ministries, Catholic Charities USA, Christian Disaster Response International, Christian Reformed World Relief Committee, Church World Service, churches of Scientology Disaster Response, City Team Ministries, Convoy of Hope, Episcopal Relief and Development, Feeding America (Formerly America's Second Harvest), Feed the Children, Habitat for Humanity International, Hope Coalition America, The Humane Society of the United States, International Aid, International Relief Friendship Foundation, Latter Day Charities, Lutheran Disaster Response, Mennonite Disaster Service, Mercy

Medical/Angel Flight America, National Association of Jewish Chaplains, National Emergency Response Team (NERT), National Organization for Victim Assistance, Nazarene Disaster Response, Noah's Wish-Animal Disaster Response, Operation Blessing, The Hands on Network, Presbyterian Disaster Assistance, REACT International, The Salvation Army, Samaritan's Purse, Save the Children, Society of St Vincent de Paul, Southern Baptist Convention – North American Mission Board, Taiwan Buddhist Tzu Chi Foundation USA, United Church of Christ- Wider Church Ministries, United Jewish Communities, United Methodist Committee on Relief (UMCOR), United Way of America, Volunteers of America and World Vision.

h. Provide an Estimate on the amount of time needed to develop the new project/document:

Two years

i. Comment on the availability of data and other information that exists or would be needed to substantiate the technical requirements and other provisions of the proposed new project/document:

Extensive experience gathered from long-term mass sheltering caused by Hurricane Katrina and Rita. There are several jurisdictions and Emergency Management coordinators that have firsthand knowledge of locating and supporting Mass Sheltering Facilities, such as the ones used during Hurricane Katrina and Hurricane Rita. The key is that this type of sheltering goes on for several weeks and jurisdictions will be faced with fire safety issues, ADA requirements and security issues such as unidentified pedophiles sleeping next to children in general population shelters.

Responses should be sent to Codes and Standards Administration, NFPA, 1 Batterymarch Park, Quincy, MA 02169-7471 or by email at stds_admin@nfpa.org, by January 27, 2012.

NFPA Releases State-Level Fire Service Needs Assessment for Every U.S. State

NFPA has released a fire service needs assessment for each state based on findings from the "Third Needs Assessment of the U.S. Fire Service", a study that looked at the current needs of America's fire departments as compared to those identified in assessments done in 2001 and 2005. The goal of the project was to identify major gaps in the needs of the U.S. fire service and to determine if the Department of Homeland Security Federal Emergency Management Agency's (DHS/FEMA) Assistance to Firefighters Grant (AFG) programs are continuing to reduce the needs of fire departments

"The progress that has been made nationally by well-targeted grants is encouraging, but there is more work to be done to ensure fire departments across the country are sufficiently prepared to protect their communities," said NFPA President James M. Shannon. "Research that identifies the needs of fire departments by state, along with details on changes in these needs over time is an important resource for states as they engage in various planning exercises."

The report looked at personnel and their capabilities, including staffing, training, certification, and wellness/fitness; facilities and apparatus; personal protective equipment, fire prevention and code enforcement; the ability to handle unusually challenging incidents; and communications and new technologies.

Deadly Power Plant Explosion Leads to Development of New Standard, NFPA 56 (PS)

NFPA responded to a deadly power plant explosion in 2010 by creating a new consensus standard in a fraction of the time required

to complete a typical document. The result, NFPA 56 (PS), demonstrates the ability of standards development organizations to move quickly to help safeguard lives and property. (Photo: AP/Wide World)

From the new NFPA Journal® By Fred Durso, Jr.

Edward Badamo was at home when he heard the distant rumbling sound. It was about 11:15 on a Sunday morning, and at first Badamo, who is chief of the South Fire District in Middletown, Connecticut, and off duty at the time, thought the rumbles were the sounds of his two Rottweiler dogs wrestling. He soon learned otherwise. Badamo's teenaged son heard the dispatches on his father's emergency radio and was the first to inform him that the noise was something worse — an explosion had occurred at Kleen Energy, a natural gas-fueled power plant under construction about five miles away.

Badamo arrived at Kleen Energy minutes later and witnessed a horrific scene: large plumes of smoke and fire erupting from the rear of the building, bloodied workers carrying their injured colleagues to safety as other workers frantically searched for survivors, ignoring the smoke and flames and live electrical hazards. The damage was so catastrophic that it took Badamo, who was the incident commander, and the other first responders nearly two days to account for all of the plant's employees, both alive and deceased. Six workers died and nearly 50 others were injured.
