Experience Expert Instruction—Where It Matters

Give your organization a competitive edge by investing in high-impact learning designed to help reduce the risks of accidents, failed inspections, and costly rework, and keep the supply chain moving. NFPA® offers a variety of instructional solutions you can hold at your facility or your venue of choice. Our On-Site and Live Virtual Training courses are designed to help build a more skilled and competent workforce, enabling your team to take on larger and more complex projects by elevating its understanding of the latest codes and standards. These interactive continuing education programs provide the opportunity to learn in your environment with the perspective of an experienced NFPA instructor joining you on-site or via a real-time digital interface to put code into context and bring it to life.

Show clients and employees that ongoing professional development and training are a top priority. We will work with you to create a customized program, scaled across global locations if required, to help your business improve safety and maximize productivity.

Our Unique Expertise

- **Expert Instruction** — Experienced NFPA instructors deftly guide you through the code, adapting their instruction to respond to your team’s specific needs.

- **Top-Flight Training Materials** — Informative, easy-to-follow workbooks and copies of the relevant code are provided to all participants.

- **Hassle-Free Implementation** — Our dedicated Account Managers work with you to identify the right program to meet the needs of your organization and ensure delivery is seamless and hassle-free.

Your Unique Experience

- **Convenience** — Save time and money by having our NFPA instructors teach your team at your facility in-person or live from a remote location.

- **Customized Application** — On-site sessions are tailored to your environment, allowing your team to ask relevant questions and apply the code right there.

- **Valuable CEUs** — NFPA is approved as an Authorized Provider by the International Association for Continuing Education and Training (IACET), so all attendees earn continuing education units.

IN THEIR OWN WORDS

NFPA’s knowledgeable instructor made the program all worthwhile. He knew his subject extremely well and also was very flexible with regard to taking questions, reviewing concepts, and putting the code to practical applications within our facility.

— Mark Kastner, Supervisor, Construction Projects Group, Maintenance Department, St. John’s Hospital, Springfield, MO

There’s only so much the code can do in black and white... NFPA’s instructor was able to explain the intent behind requirements. Understanding the background enables you to solve problems on your own.

— Stephanie D. Ireland, AIA, LEED AP-BD+C, CEO and Principal Architect, Ireland Architects, Springfield, MO
