

# ON-SITE TRAINING

## Experience Expert Instruction—Where It Matters

Whatever your safety issues or safety information needs, NFPA® has the knowledge and training to help. One of the best ways to help your team improve safety on the job, or to make your own workplace safer, is with our NFPA On-Site Training. Experiencing safety knowledge in your own environment, and with the perspective of an NFPA expert by your side, puts code into context and brings it to life. It also helps your team understand the thinking behind the code to improve each team member's application of it.

At NFPA, with experts in all industries, we know the environments your teams work in. Together, we will create a tailored training program—scaled across global facilities if needed—to help your team maximize its safety learning.

## Your Unique Experience

- *On-site Convenience* – Save time and money by having expert NFPA instructors visit your facility and employees.
- *Customized Application* – On-site sessions are tailored to your environment, allowing your team to ask relevant questions and apply the code right there.
- *Valuable CEUs* – NFPA is approved as an Authorized Provider by the International Association for Continuing Education and Training (IACET), so all attendees earn continuing education units.

## Our Unique Expertise

- *Expert Instruction* – Experienced NFPA instructors deftly guide you through the code, adapting their instruction to respond to your team's specific needs.
- *Top-flight Training Materials* – Informative, easy-to-follow workbooks and copies of the relevant code are provided to all participants.
- *Instant Implementation* – Our Professional Development staff handles all consulting and scheduling details, making the process completely seamless and hassle-free.

## IN THEIR OWN WORDS

"NFPA's knowledgeable instructor made the program all worthwhile. He knew his subject extremely well and also was very flexible with regard to taking questions, reviewing concepts, and putting the Code to practical applications within our facility."

– **Mark Kastner**, Supervisor, Construction Projects Group, Maintenance Department, St. John's Hospital, Springfield, MO

"There's only so much the Code can do in black and white... NFPA's instructor was able to explain the intent behind requirements. Understanding the background enables you to solve problems on your own."

– **Stephanie D. Ireland**, AIA, LEED AP-BD+C, CEO and Principal Architect, Ireland Architects, Springfield, MO
